EDITORIAL

ABOUT TIME

It's about time this magazine showed up you say!!. Thats true this issue is late because we held it back, as I stated in the last issue there were a lot of subscriptions due, and for us to get our bulk mailing fees we must post at least 350 magazines, I hope you forgive us for the delay but the next issue will, or might be on time.

MUSIC COMPETITION

Where is your entry for the music competition?
I thought this would attract a lot of interest, but maybe I was wrong we only have 2 entries. I did not put an Entry in by date on the competition because I thought I could let you know by this issue how things were going, well the closing date for all entries is -
31 May 1988. If you want your tape or disk back please enclose money enough to do this.

SOFTWARE SWAPPING

I have received a small response to the software swapping idea, with about 5 people sending in their lists of software. If you have original software and you wish to swap it for something of the same value please write to us, I again ask you to send it in this format-

MACHINE, TITLE, COST, TYPE OF PROG.
SVI 318 Blowout $23.00 Game Cass.
Sony MSX Chess $26.00 Game Disk.
SV728 MSX Golf $46.00 Game Cart

Please included your Name, Address and Phone number with your lists.

COVER WINNER

This issues cover winner is -

Jared Hyland of New Zealand.

We all agreed that Jared's design was very original and also well drawn.

PUZZLE CORNER

CROSSWORD

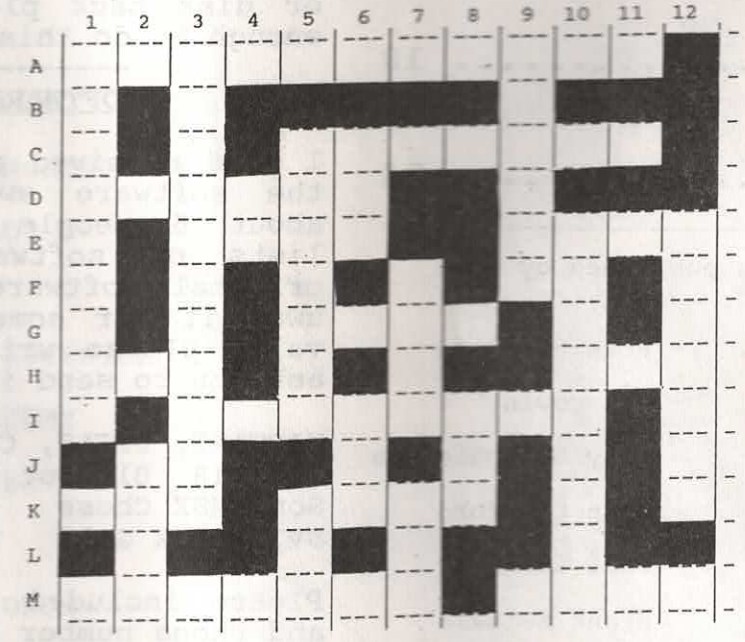

This puzzle is based on game titles (supposedly), but as you probably saw by the word search (answer contained), I make a few wee funny ones to make it all fit. Anyhow (As Paul Hogan used to say) have a go at this one. TIME LIMIT OF 20 MINUTES
(P.S. Anyone not being able to find BAUD in the word search.....dont you know how to spell BAVD...SORRY)

ACROSS:

A1) DEVIL TYPE WITH UNFRIENDLY APPROACH (5,6)
C5) MESSY OCCUPATION OFF SCREEN (7)
D1) CAN AFFECT ELBOWS BADLY (6)
E3) CHANGE VOWEL TO AN -I-, REVERSE WORD AND MAKE A JUMPER. (4)
E9) TO HAUL ITEMS (4)
G5) OPPOSITE TO PRO- (4)
H1) DECADE (3)
H10) SMALL PIXIE (3)
I3) THIS OCCURED ON THREE MILE ISLAND SEVERAL YEARS AGO (8)
J2) GRANDFATHER OR __ (2)
K1) PURPOSE OF GAMES IS TO ___ (3)
K5) YOU SEND ALOTTA LETTERS (Initials 1,1,1,1)
M1) BASE IN THE CLOUDS (3,4)
M9) EMBARRESSING (WET) PROBLEM (4)

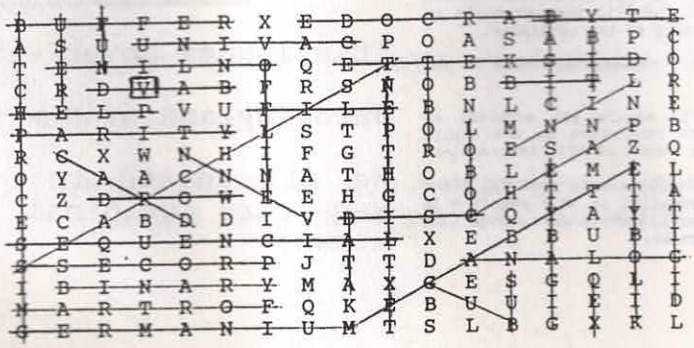

DOWN:

1A) LARGE CITY FILLED WITH TOMB STONES (5,4)
3A) HAIRY HUMAN FROM THE HILLS (8,3)
9A) SHARKS ARE FAMOUS FOR THIS (6)
5C) DONT TILT THIS ONE (7)
6C) ___ AND YE SHALL RECEIVE (3)
4D) WHEN A QUESTION DOESNT APPLY (Initials 1,1)
10E) THAT COLUMN WHICH HAS BEEN MISSING LATELY (9)
12E) POLICE BRANCH (7)
7F) JOAN COLLINS MADE A MOVIE WITH THIS TITLE (4)
6I) A STATE TO BE IN ___MANIA (3)
8I) NOTED TO BE WISE, WHO YOU SAY (3)
2J) TO CHOOSE OR (4)
5K) POWERFUL FORCE TODAY (Initials 3)
7K) PRIMATE (NOT HUMAN) (3)

LAST ISSUES WORD SEARCH SOLUTION

ADVENTURES ANONYMOUS

WITH YOUR GUIDE ALAN CRAWFORD

After a short break I'm back once again to help any readers who may be having problems in an adventure game. Just drop me a line and I will do my best to solve your problems. If you would like to make a comment about adventure games or give tips on an adventure you have completed then this column is open to you.

This month I have decided to have a look at DOTSOFT'S, THE CASE OF THE MAD MUMMY. By the way if anyone out there knows the address of DOTSOFT please let me know.

We start outside the hideous door, about to be attacked by howling dogs, the same dogs that where in BASTOW MANOR, (I recognized the howls). Here we have a door and mists, simply 'OPEN DOOR' and go 'NORTH'. We are now in the entrance foyer, with a mirror that you can 'READ' and dust which is of no importance, and a set of stairs to the east. To negotiate the broken disused stairs you will have to 'DROP TIMBER' on the stairs. You will find the timber in the basement, we will get to the basement shortly.

Just north of the entrance foyer we find ourselves in the north hall. The only thing of interest here are the drapes which lead to the most important room in the house, the temple like room. This is where the whole game is centred around. To gain entry to this room you will need a ring which is in the stone cell west of the basement. Before we move on you will need to get the cord that is tied around the drapes. From here we go west to the cosy study where you will find a desk, sideboard and lamp. In the draw in the desk are some matches that we will use later to light the candles. By turning the knob on the lamp to make it brighter you will be able to see a syphon on the sideboard which will be used to extinguish the fire in the lounge.

Two east's from here and we are in the library where we find a birdcage and some books. To get the birdcage you will have to open it and unscrew it. to get the books you will be asked for a title. This title can be found in the upper hall via the disused stairs, we will come to that shortly. From here go west to the north hall, then head north to the south hall (That makes a lot of sense does'nt it). Here we find a picture and some cobwebs, you can look and examine the picture but as with the cobwebs, it is of no great importance. West will take us into the lounge where we find a bow, sofa and hearth. The sofa is of no use. In the hearth is a fire which should be extinguished with the syphon, but you will have to wait for a while before you can remove the logs which are still hot. The bow is used in conjunction with the cord and an arrow (which is in the

basement), the cord should be tied to the arrow and then fired up the chimney giving access to the the roof.

West, twice from here takes you to the dining room where there is a knife, fork, table and armour, don't try to get the axe unless you want a split personality. On the table there is the candles which you will need at various locations in the house. The fork is used to gain access to the basement via the kitchen which is east and then north from the dining room. In the kitchen the bench and stove have no purpose, but the door to the basement can be opened using the fork to pick the lock. Once inside the basement you will find a tin (Of petrol) and a crate. In the crate there is the arrow and a hammer, used the hammer to break the crate (Giving you the timber for the stairs). By moving the crate you will open up an exit west, this will take you into the dusty dank room, you will have to light the candles before you can enter. A word of warning when you decide to light the candles, you only have so many matches and you will have to be careful how and when you use them to be able the complete the game. So do as much as possible first and leave lighting the candle to the last minute.

Before entering the dusty dank room you should take the timber the disused stairs , drop it and 'GO STAIRS' to the upper hall where you find a jacket and a door, by examining the jacket and wallet you will find the note with the title of the book in the library (You can read the book if you take it to the cosy study where the bright lamp is). Then go north to the bedroom, where you can unscrew the knob from the bed. The knob is needed in the dusty dank room where you should now go.

In the dusty dank room there is a rag (Of no use) and the sarcophagus which can be opened by turning the clasp and then inserting the knob which you found in the bedroom. This opens the entry to the stone cell (West). In the stone cell there is a ladder and a coffin. You will need to take the ladder to the bedroom and drop it, this is your exit from the attic. The coffin can be opened and the skeleton examined to get the ring (Needed in the north hall). From here go back to the lounge light candle and 'CLIMB CORD' that you fired up the chimney, until you reach the roof where there is a tile that should be moved to open up a hole which you can now go. In the attic there is an ANKH which you need and a door that you open. This is a trapdoor in the floor which leads down to the bedroom and as long as you have already dropped the ladder in the bedroom you will be able to climb down. This is the only exit from the attic. Now go too the north hall and 'MOVE DRAPES', this will open up a hollow, 'LOOK HOLLOW' and then 'INSERT RING' this opens a door to the temple like room. Here you will need the birdcage, ring, ankh and book. By droping these items in the correct order pictures appear on the panels on the wall. As each object is dropped the picture that appears denotes the next object that should be dropped. Doing this in sequence will open up an exit in the chimney to the next stage of the game. This is where you should save the game and wait till next month for part two.

Well thats about all for this issue, but dont forget to drop me a line if you are having any problems with an adventure (enclose s.a.e.). Till next time, Bye for now. ALAN

```

I made up this small program so we could have a bit of a laugh while we learn a bit more about Basic.

In this issue we will use some old commands as well as new one's such as -

WIDTH DIM READ DATA RDRST = RND

WIDTH

The width command is used to set the screen's width the minimum width is 1.

DIM

The word DIM is short for DIMension, and is used to set up what is known as ARRAYS.
An ARRAY is a group of variables eg-A$(20),B$(20) the only difference is the number used.

READ

The command READ does exactly what it says, it READs DATA statements.

DATA

The DATA statement is used in conjunction with the READ statement. Names, numbers or both can be stored in DATA statements.

RDRST

This command statement is used in conjunction with RND. By using them both together it sets up a RaNDom number generator with the internal clock, eg- Line 300

Now let's pull apart the program lines and see what the commands you have not used yet, do.

10 WIDTH 39
The reason I picked this width is because when my computer starts up it is automatically set to that width, But, some MSX computers set up to a different WIDTH, so by setting the width this solves that problem.

20 DIM
As I said DIM is short for DIMmension, what it does is sets up an ARRAY or (Empty) box that is numbered.
I put the names in there as well but normally it is an empty numbered box, waiting to be filled.

	A$(20)	B$(20)	C$(20)	D$(20)	E$(20)
1	KEVIN	LOVES	JULIE'S	NOBLEY	EARS
2	GARY	BIT	CATHY'S	BENT	EYES
3	FRED	HATES	NANCY'S	CROOKED	LEGS
4	HARRY	GRABBED	JENNY'S	STRAIGHT	DOG
5	BILL	TOOK	PAT'S	GREAT	FEET
6	JACK	DISLIKES	CINDY'S	FLOPPY	NOSE
7	FRANK	CANT STAND	TINA'S	SAGGY	CAT
8	PETER	BITES	ANNE'S	SCABBY	HEAD
9	PAUL	MARRIED	CAROL'S	WONKY	FOOT
10	STEVE	KISSED	PENNY'S	HARD	CAR
11	TED	LIKES	MARY'S	SEXY	HAND
12	JOHN	CHEWED	BETTY'S	SKINNY	NECK

The box should really go to 20 but I only put 12 names in the DATA statements, if you wish you can put in 20 or as many as you like, but, remember to change your DIM statement number.

```
40 FOR X=1 TO 12:READ A$(X):NEXT X
```
This is how our empty numbered box is filled.
The first time through the loop or counter X=1 so then it says READ A$(1), it then looks for the first DATA statement it can find and puts that Name, Number or Sentence into A$(position 1) of our empty box.
Then we have NEXT X, which means add 1 more to X.
So it then READs A$(2) and puts that into position 2 etc etc until X=12 and it moves onto the next line.

```
50 DATA
```
This line does not perform any function other then to be READ by the READ statement.

Each loop and READ statement performs the same task until all DATA has been READ and our box is full.

```
300 RDRST=RND(-TIME)
```
This line sets up a RaNDom number generator using the computers internal clock. The internal clock starts when the computer is turned on, if you wish to see how long the computer has been on type in ? TIME this will then display Minutes and Seconds together.

```
310 Q=INT(RND(1)*12+1)
```
This line picks a number between 1 and 12 and stores it in the letter Q .
Lines 310 to 350 all do the same except they use different variables to store the numbers.

```
360 LOCATE AND PRINT
```
This line firstly locates the cursor to 0 across by 10 down and then prints A$(Q) and so on.
Say at the time the RaNDom numbers selected for QWERT were Q=6, W=2, E=5, R=9, T=11.

It would pick out the words -

A$(6)	B$(2)	C$(5)	D$(9)	E$(11)
JACK	BIT	PAT'S	WONKY	HAND

```
380 INPUT
```
This line is set up to ask you if you would like to continue by pressing [ENTER], or, type in 1 and it will end.
If you just press enter the variable ZZ will equal zero, if you enter a 1 then line 390 comes into affect.

```
390 ZZ=1
```
If ZZ=1 then this line turns the function key display on and ENDs the program.

```
400 CLS:GOTO 310
```
If the value of ZZ equals zero then this line clears the screen and goes back for another number.

Try changing the names in the DATA statements to something else.

Well that's about it from me for this issue, have fun and remember if you have any queries send them in.

CASSETTE INTERFACING FOR THE SVI X'PRESS

by ARGUSY

My main Christmas present for 1986 (from myself to myself) was the SVI-738 X'press. My choice was influenced by my already owning an SV-328 with the expander, two disk drives and a printer for over two years. For a while I enjoyed myself transferring files between the two computers, but the real (!) users kept on pointing out that something was missing, regarding games.

DOS is dandy, but only cassette decks get cassette based programmes or data into a computer and in the end I came up with two solutions to appease my children.

The first solution was to use the Tandy Minisette 9 cassette deck and matching computer cable. The cable was modified to suit the port by replacing the five pin DIN connector with an eight pin DIN connector and rewiring it as per diagram 1 below.

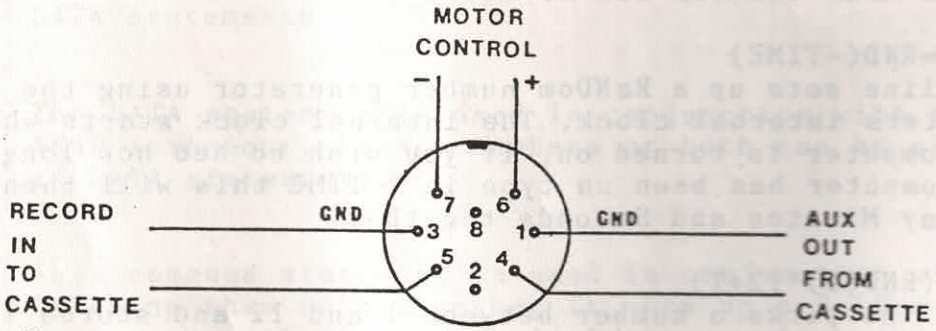

Diagram 1. Interface Cable Connections (Rear View)

The second solution was to use my trusty SV-903 cassette (the one with SOUND). These early SVI cassette decks were supplied with +12V from the SV-318/328, so the X'press has to be modified to provide the power.

First, remove the case screws from the X'press. Turn it back up the right way and carefully lift the upper case up and forward, as the keyboard wiring feels like it is made from steel wire.

The layout inside the X'press is on two boards - a small power board on the left side and a large mother board takes up most of the remaining space. Good for fault finding when things go wrong. (I hope not!)

SVI-728/SVI-738 Pinout

Pin	Function
1	GROUND
2	GROUND
3	GROUND
4	CMTOUT
5	CMTIN
6	REM+
7	REM-
8	GROUND

SV-903/SV-904 Pinout

Pin	Wire colour	Function
1	BROWN	+12V
2	WHITE	CASR
3	GREEN	CASW
* 4	BLACK	AUDIO
5	ORANGE	GROUND
6	YELLOW	ME
7	BLUE	READY

* Not used in SVI-904
Wire colour may be different

List 1. Computer and Cassette Pinouts

As shown in List 1, pins 1,2,3 and 8 of the cassette port are grounded. This seemed to be an over dose of grounds for the SV-903, so I used pin 8 for +12V power. To modify the X'press, remove the power supply screws and turn the board over. Note the +12V output marked on it. On the cassette port, cut 3-4mm out of the vertical part of pin 8 and solder a link from pin 8 around the main board to the +12V. Then reassemble the X'press.

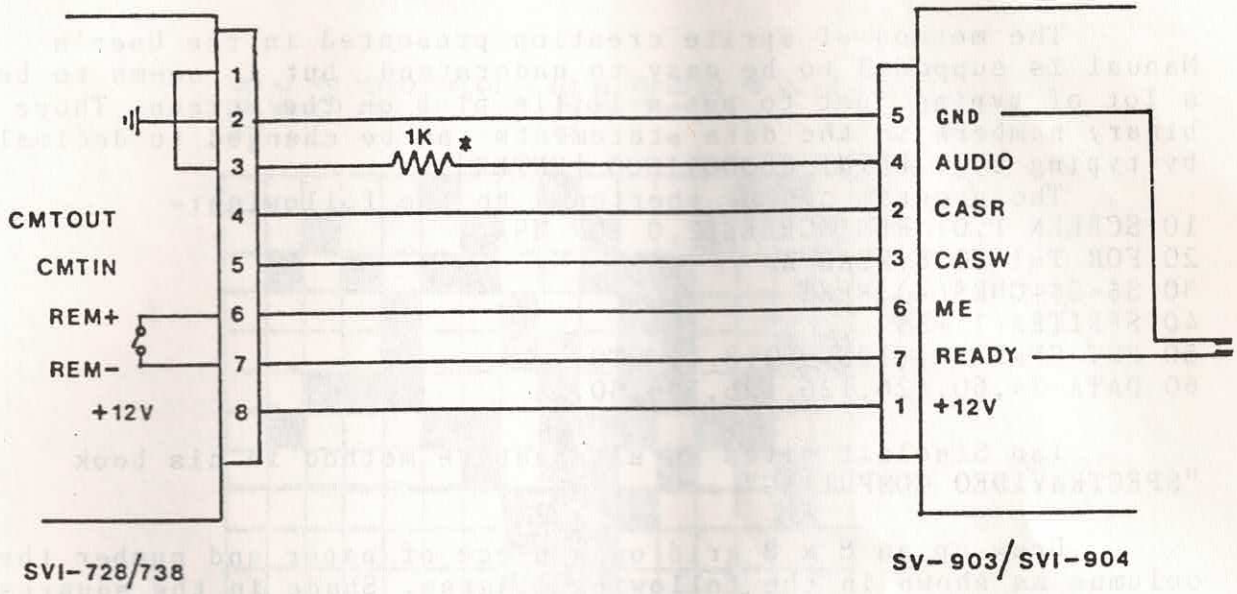

Diagram 2. MSX Computer to SVI Cassette Cable Wiring

Now for the SV-903. Cut the cable about 10cm away from the 7 pin AMP connector and solder in an 8 pin DIN plug as per Diag 2. Compatability with the SV-318/328 can be maintained by wiring up the cut off section with an 8 pin DIN socket. If the deck is to be permanently used on an X'press, SVI-728, (or any MSX computer), then cut as close as possible to the connector. The 1K resistor is used to terminate the AUDIO line from the SV-903 cassette. (The SV-904 doesn't have this facility).

After I completed this, I connected up the cassette deck and performed some preliminary functions of the deck. In went 'Ghostbusters'. Nearly five minutes later the logo came up and my son promptly took over. Since then, I have had no problems loading any cassette programme. (The minisette 9 volume had to be adjusted occasionally). So I now have a matching Spectravideo cassette deck for my X'press.

Thankyou Argusy for sharing your interfacing project with us, and if any one else has undergone a project with pleasing results please write in and let us all know about it.

PROGRAMMING WITH SPRITES - Part 1

by **Lucille Parker**

Interested in writing programs with sprites but don't know where to begin? The User's Manuals don't cover this subject in much detail, so I will attempt to educate you, via this four-part series, to the point where you can dazzle your friends who own those other, inferior brands of computers, with the ease of sprite-handling on the SV/MSX machines.

SPRITE DESIGN

The method of sprite creation presented in the User's Manual is supposed to be easy to understand, but it seems to be a lot of typing just to put a little plob on the screen. Those binary numbers in the data statements can be changed to decimal by typing e.g. PRINT &B00011000 [ENTER].

The program can be shortened to the following:-

```
10 SCREEN 1,0: REM SCREEN 2,0 FOR MSX
20 FOR T=1 TO 8:READ A
30 S$=S$+CHR$(A):NEXT
40 SPRITE$(1)=S$
50 PUT SPRITE0,(128,96),8,1:GOTO 50
60 DATA 24,60,126,126,126,126,60,24
```

Ian Sinclair gives an alternative method in his book "SPECTRAVIDEO COMPUTING".

Draw up an 8 x 8 grid on a piece of paper and number the columns as shown in the following diagram. Shade in the squares required to create your shape. To get the eight numbers for your sprite data, look across each row and add up the column numbers for each square that is shaded.

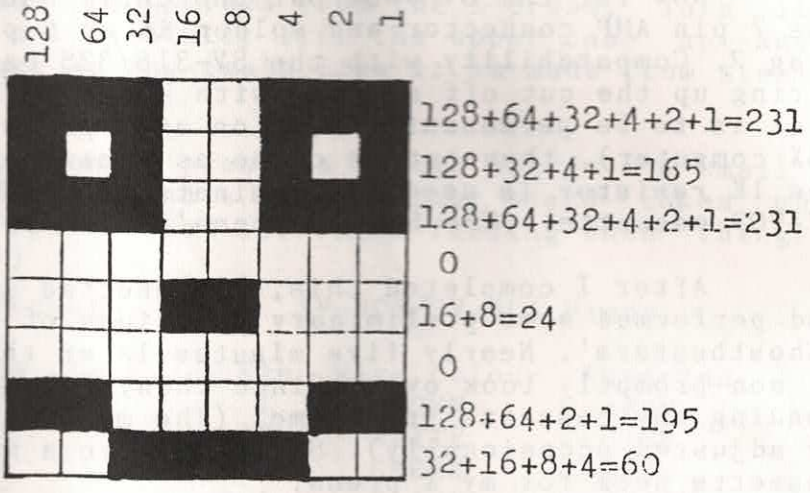

Diagram 1

Larger sprites can be created on a 16 x 16 grid. First, shade in your design on the grid, then divide it into 4 even squares. Your data numbers are collected in the same way as for small sprites, by taking each of your four 8 x 8 pieces of the large grid in turn. You will end up with 32 numbers, and it is very important that these numbers are in the correct order. They must be calculated first for the top left section, then bottom left, top right, then bottom right.

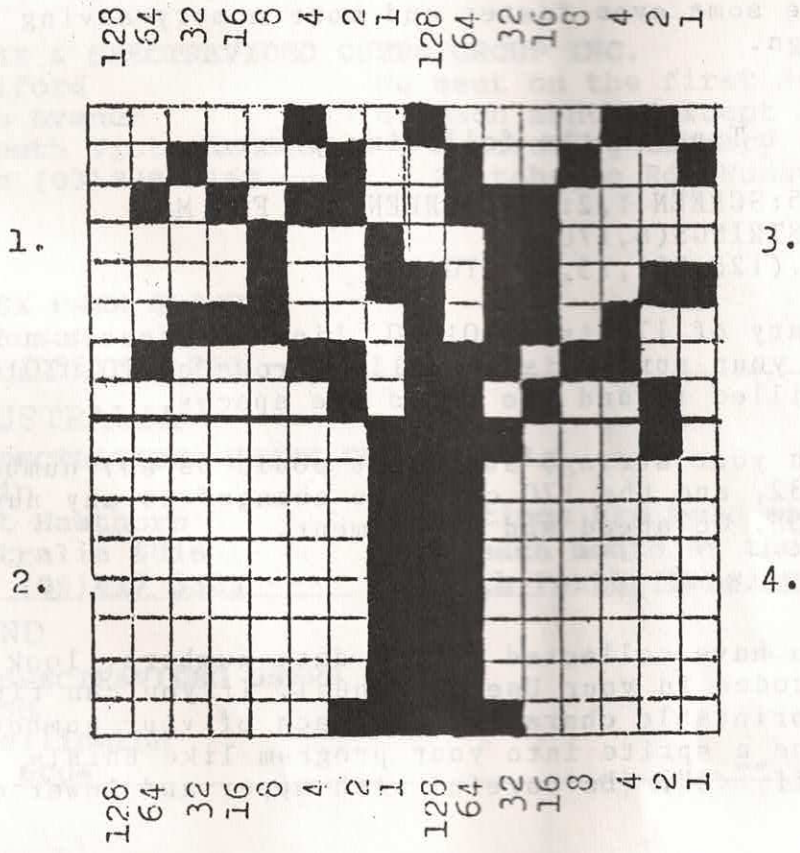

Diagram 2

Here is how the above information is put into a program.

```
10 COLOR 12,1,14:SCREEN 1,2:REM SCREEN 2,2 FOR MSX
20 FOR T=1 TO 32:READ A
30 S$=S$+CHR$(A):NEXT
40 SPRITE$(1)=S$
50 PUT SPRITE0, (128,96),12,1:GOTO 50
60 DATA 4,34,86,9,9,56,70,2,1,1,1,1,1,1,1,3,134,73,112,48,179,
180,236,210,226,192,192,192,192,192,192,224
```

Both small and large sprites can be magnified by changing the second number in the screen command. Screen 1,1 gives you a magnified 8 x 8 sprite, and Screen 1,3 gives you a huge 16 x 16 sprite. You can also put sprites on screen 2 in exactly the same way as for screen 1. They won't be enlarged the way text is on screen 2.

Sprite design is of course made much quicker and easier by the use of a sprite editing program.

QUICK SPRITES

Here are some even faster and more memory-saving methods of sprite design.

METHOD 1

Type in the following program.

```
10 COLOR 15,4,5:SCREEN 1,2:REM SCREEN 2,2 FOR MSX
20 SPRITE$(1)=STRING$(8,170)
30 PUT SPRITE1,(128,96),15,1:GOTO 30
```

The binary of 170 is 10101010. Line 20 creates a striped sprite because your sprite is actually 8 rows of 10101010, where the ones are filled in and the zeros are spaces.

The 8 in your string$ statement could be any number between 1 and 32, and the 170 could be changed to any number betwen 1 and 255. Go ahead and experiment.

METHOD 2

When you have collected your 8 data numbers, look up your list of ASCII codes in your User's Manual. If you can find a corresponding printable character for each of your numbers, you can quickly type a sprite into your program like this:- SPRITE$(2)="BBff~~<$". (Be careful with upper and lower case letters).

For numbers that don't have a corresponding printable character, you can use CHR$( ) instead. In that case, your sprite information may end up looking something like this:-
SPRITE$(2)=CHR$(129)+"B<B"+CHR$(165)+CHR$(153)+"B<"

Don't be put off by the weird appearence of these statements. If you like experimenting with sprites, send us in your quick sprites to share with other members. They save a lot of typing.

Next issue I will show you how to get the little critters moving, as well as ON SPRITE GOSUB and STRIG.

USER GROUPS

SYDNEY

We have been advised of a group in Sydney for Spectravideo owners- Please contact Malcolm Samuels on 888 7664 after hours.

QUEENSLAND

BRISBANE SPECTRAVIDEO & MSX USERS GROUP
C/- Mr Noel Bergman (Secretary)
16 Surrey Road.
Bellbird Park Queensland 4300

VICTORIA

MELBOURNE MSX & SPECTRAVIDEO USERS GROUP INC.
C/- John Halford
48 Shawlands Avenue
Blackburn South Victoria 3130
---- Phone (03)878 6169 ----

We meet on the first Saturday afternoon of each month (except January) at the Nunawading Library meeting room Whitehorse Rd. Nunawading.

GIPPSLAND MSX USER GROUP
C/- Ross Johnson
---- Phone (051)344 753 ----

WESTERN AUSTRALIA

THE MSX & SPECTRAVIDEO USERS GROUP OF W.A
C/- Max Cowin
PO Box 87 Mt Hawthorn
Western Australia 6016
---- Phone (09)417 3323 ----

Meetings are held on the LAST Tuesday of each month at the Colin st. Hall South Perth (Kensington) at 7.30pm.

NEW ZEALAND

WELLINGTON SPECTRAVIDEO USERS GROUP
PO Box 26-050
Newlands, Wellington
New Zealand 6004

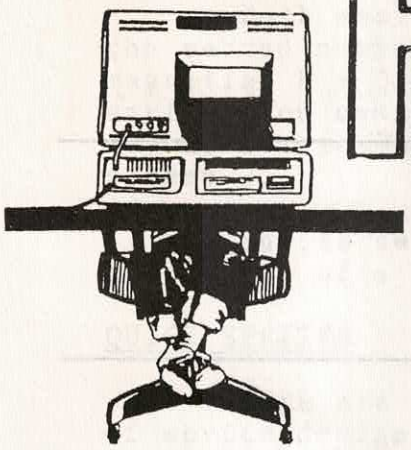

CANADA

MAILBOX

Here is a letter we received from John Knight in Victoria.

(We sent a cheque to John in payment of some programs that he sent to us as listings.)

Dear Ross & or Max

Well, well, well, congradulations Australian Post! Guess what I finally got in the mail! (5.2.88)
Please find enclosed one $20.00 cheque dated 30.9.87 Australia Post finally delivered after 4 months.

At least you know that no-one cashed it in. I am sending it back to you since you have already compensated me with two games in lieu. Now we can trust each other 100% (I must admit, I had my doubts, as you probably did.)

P.S. I hope this letter doesn't take 4 months to reach you.

REPLY

Well what can I say?, although the cheque did get lost it's a bit hard to blame Australia Post, but we will. And thankyou for your vote of confidence.

---

1. If Roger Stockburger is out there listening, could you please give details, maybe via an article, on your tape header read program, so that we can copy some of our tape based programs to disk?

2. Does anyone out there have a machine code routine that can sort elements in array (numeric or character data)?

It is a pity that Robert Brinkworth has gone walkabout again because it leaves a sort of a hole in the magazine. Maybe he went away for a holiday. Here's hoping he will return.
In the meantime, a hearty thank you to all people who contribute to the ONLY MSX & Spectravideo magazine we have.

John Knight Victoria.

Here is one of the best letters we have ever received, and it's from Cathy Simpson of Victoria.

Dear Computer Forum,

It has taken me some time to write this letter to you and I apologize, it is true what you say in your magazine about us, the readers, should input more.

In Vol:2 No:3 you gave the estimated costs of producing this magazine, and I'm sorry but I doubted you, so I took your magazine to various places, such as the printers to see how much it would cost to get 500 magazines printed, I then priced all of the other materials including postage.

I then added it all up over 1 year and below are my findings-

Materials- Paper, Glue, Pencils, Pens etc ----	$ 118.96
Artist & Cover winner ----------	$ 560.00
Printing (and this was the cheapest) ---------	$8430.00
Plastic bags, Labels & sealing ----------	$ 876.00
Postage of magazine -Overseas and Australia --	$2280.00
TOTAL ---	$12264.96

This total does not include Your time, or the hidden costs you mentioned, such as Phone bills, Electricity bills and so on.

I really must say that you are doing an excellent job which really does not produce any rewards. And if your only doing it to keep MSX & SPECTRAVIDEO alive in this country, I wish there were more people around like you.

I would also like to say, this is the only contact that we have with MSX & SPECTRAVIDEO so I think you should be getting something from it and I vote that our Subscription rates go up to $42.00 for 12 months and $23.00 for 6 months, which is only 50c a magazine more, so come on all you people out there let's help these people keep this magazine going, because I know if I was doing it and not making any money, I would not be doing it long.

Keep up the good work, Cathy.

P.S. Please put my letter in your mailbox section.

REPLY

Dear Cathy, thankyou for those kind words and we were actually thinking of puting our costs up because the price of printing went up as well as packaging costs. We will do our sums and our prices will go up in our next issue VOL:2 No:8.
When you read a letter like that it gives us a little more confidence in what we are doing, because there are times when we feel like just chucking the whole thing in, and forgetting about MSX and SPECTRAVIDEO.

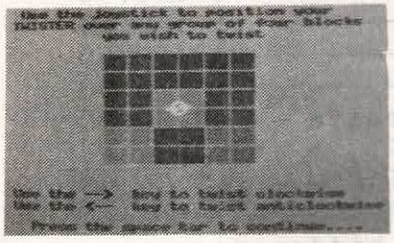

SPECIAL OFFER TO COMPUTER FORUM SUBSCRIBERS

FDS GAME PACKS FOR SV AND MSX

ALL ONE PRICE $10 PER PACK (Includes postage in Australia)

Please send all orders to PO Box 87 Mt Hawthorn WA 6017

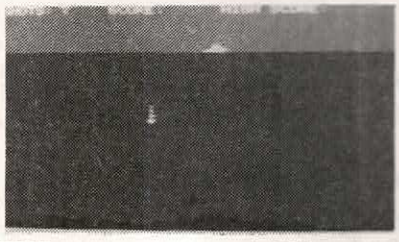

Make cheques payable to COMPUTER FORUM

SVPAK23 - MSXPAK23 -

TWISTER - Like a two dimensional Rubiks cube, this game displays nine different coloured squares each containing four smaller squares. These 36 squares are then jumbled around on the screen and you must rebuild the original display. Its very simple - VERY addictive!

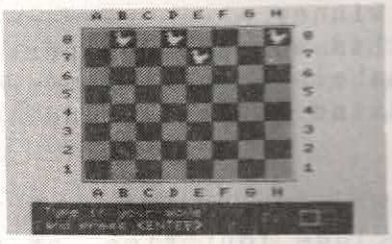

REVERSE - Your task is to arrange the ten jumbled numbers into ascending order by reversing some or all of them. Check it out - its not easy!

TS852 - MSX852 -

GRAND PRIX - You are in the drivers seat in a race to the chequered flag while avoiding slower cars. Hitting another car or two wheels off the track will slow you down and lose points.

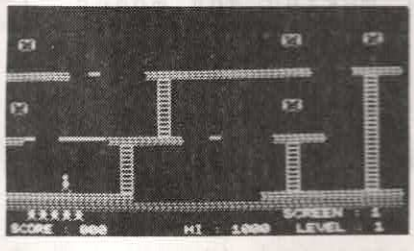

SUBSTRIKE - Drop depth charges on the enemy below. The deeper he is or the faster he moves, the more you will score.

SVPAK24 - MSXPAK24 -

FOX & GEESE - Can you as the Fox penetrate the line of advancing geese and get to the other side of the board before they corner you.

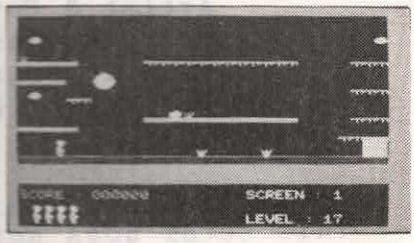

THINK - This is a form of word mastermind. You must guess the word that the computer has selected from the vast number stored in its data banks. This game will certainly make you do as the name suggests.

SVPAK7 - MSXPAK7 -

BOMB SCARE - Very addictive game in which you must climb to different platforms and defuse 5 bombs before your bonus runs out. Has 6 separate screens with the hazards of moving platforms and conveyor belts with holes in them.

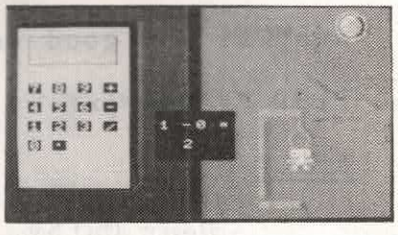

DUNGEON ADVENTURE - A text adventure where you explore the dungeon fighting monsters and gain treasures to discover the location of the great Orb.

SVPAK21 - MSXPAK21 -

GOLDRUSH - Move the miner around the different levels of the mine collecting gold and dodging high explosive charges and falling rocks. The green ledges crumble if you don't get off quickly. When you have collected all of the gold, get to the lift cage for a new screen.

PYRAMID - This is another fascinating text adventure built around the vaults of a pyramid.

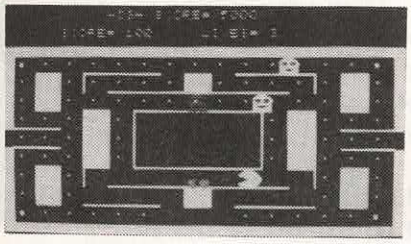

SVPAK25 - MSXPAK25 -

OZMAP - You must drive the car around Australia finding the places required as quickly as you can.

OZQUIZ - Answer general knowledge questions about Australia and her people.

MATH DUEL - Makes practicing maths fun! Has 4 levels of addition and subtraction maths.

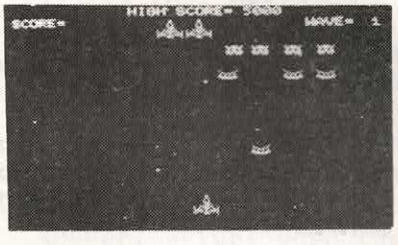

Prices include postage and packing within Australia

SVPAK12 - MSXPAK12 -

MUNCH MAN - Guide your Munchman around the maze eating the dots while avoiding the deadly ghosts. If you eat one of the larger dots you will be able to eat the ghosts for a short while. Gain extra points by eating the fruit that occasionally appears on the screen.

ESCAPE FROM PLANET BETA - This is a text adventure where you are stranded on Planet Beta and must find all the necessary equipment to get off before the planet explodes. Only requires one or two-word commands - eg GET LASER.

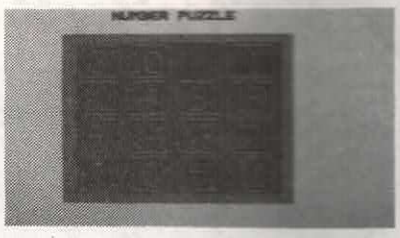

SVPAK5 - MSXPAK5 -

LUNAR LANDER - You are in command of a Lunar Excursion Module with limited fuel but full rotational ability and must land on the lunar surface. Has 8 different landscapes which get harder

GALACTIC ASSAULT - The alien invaders hover above you and one at a time dive on you. Destroy each wave before they get you. For 1 or 2 players.

ROAD RACER - Try and pass as many cars just as fast as you can without crashing.

SPRITE DEFINER - Design sprite shapes on the screen and rotate them when you have finished. Has grids for both sprite sizes.

SVPAK20 - MSXPAK20 -

ARTILLERY FIRE - A two player game where each can select a firing angle and velocity to lob shells on his opponent.

NUMBER PUZZLE - Computerised version of the popular hand-held game in which you must slide numbers around into ascending order.

TOWERS OF HANOI - Move all of the discs from peg 1 to peg 3 without placing a large disc on a smaller one.

TENNIS - This is a two player game of Table Tennis.

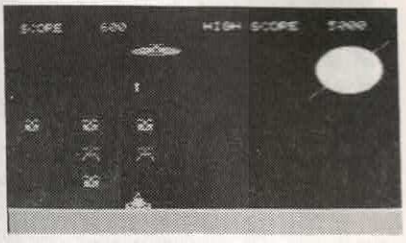

SVPAK6 - MSXPAK6 -

HOPPER - Help Hoppy get across the road (SPLAT!) and then to cross the river (SPLOSH!) and if you are lucky he won't get eaten by the crocs (GULP!!).

SPACE WAR - Challenging game for two players in this duel between your spaceship and that of your opponent. First one to ten points wins.

OTHELLO CHALLENGER - The classic mind game where you must outflank your opponent to capture his pieces. For 1 or 2 players.

PAINTER - Explore the flexibility of your computers colours with this on-screen paint brush.

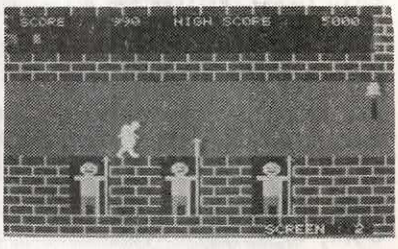

SVPAK9 - MSXPAK9 -

SPACE INVADERS - Shoot the aliens before they invade your planet. Move your ship left and right and shoot missiles at the aliens. Once they have landed the game will end. Score extra points by shooting the UFO which flies overhead.

SUB HUNT - Drop depth charges on the attacking subs and dodge the missiles they fire. You can fire two depth charges at once by firing while moving left or right. Each of the subs is marked with its value.

CHICKEN - Who cares why the chicken crossed the road, we have to find out how! Each time you make it across, the cars speed up.

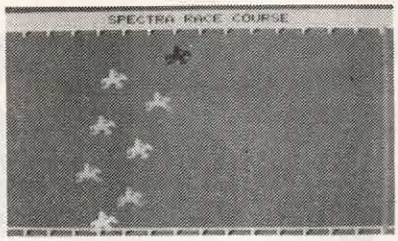

SVPAK11 - MSXPAK11 -

LUNAR RESCUE - Rescue the stranded astronauts from the moons surface one by one. Dodge the asteroids on the way down and destroy them on the way back up for more points.

SKY BASE - Blast the aliens but watch out for their kamikazi attacks. Shoot two sets and then dock with your mother ship. With this added fire-power go on to destroy the alien base.

QUASIMODO - Can you as the hunchback Quasimodo rescue the beautiful maiden from the French soldiers. Cross the screen avoiding fireballs and spears, then ring the bell to get the next screen.

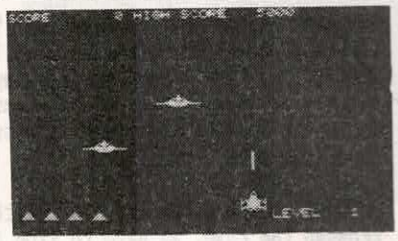

Prices include postage and packing within Australia

SVPAK1 - MSXPAK1 -

SPECTRA DERBY - Place your bets and have a day at the races. Even if you lose its painless.

HANGMAN - The classic word guessing game in which you will be gradually hung for each wrong letter.

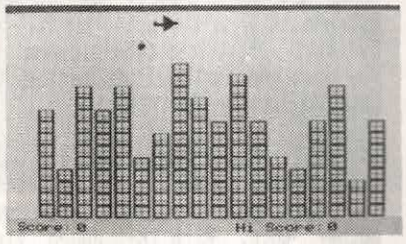

SVPAK10 - MSXPAK10 -

DEMON ATTACK - Shoot the attacking demons as they swoop overhead. You can only destroy a demon when it is fully formed. Killing ten demons gets you on to a harder set.

SEA DIVER - Dodge sea creatures as you make your way to the sea bed. Grab a gold bar and get back to the surface.

DEATH CITY - Race around the maze trying to shoot your computer opponent but be careful, he is also shooting at you.

SVPAK2 - MSXPAK2 -

SNAKE - Move the snake around to eat the diamonds, but mind you do not cross your own tail.

CITY BOMBER - You must destroy the towering buildings of the city before you can land safely.

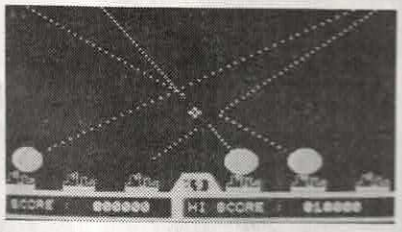

SVPAK8 - MSXPAK8 -

EXPLORER - Watch out for the Pitfalls in this game which will test your control of the joystick. Crocs and other obstacles bar your way as you wander through the jungle in search of treasures.

PARACHUTE - Catch the paratroopers in your boat as they jump from a helicopter into a shark-infested lagoon. The more you catch, the faster they jump.

ANDROID CAVERNS - Move around the caverns of this game and collect the treasure guarded by the androids. But watch out, the androids learn by their mistakes.

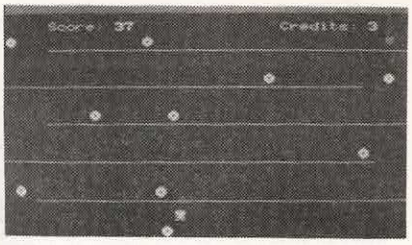

SVPAK22 - MSXPAK22 -

MISSILE COMMAND - Shoot down the incoming warheads before they destroy your cities. You get bonus cities awarded for high scores.

MASTERMIND - Your task is to match the same hidden four-colour combination that the computer has chosen.

LEAKY ROOF - Catch the raindrops leaking through the roof and empty the bucket out of the window before you drown.

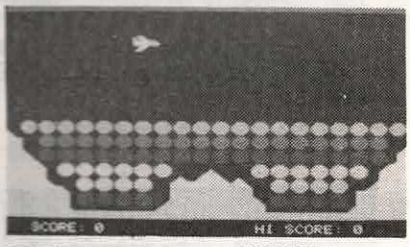

SVPAK4 - MSXPAK4 -

SPECTRA KONG - Win the lady's heart by getting to the top of the screen - but watch out for falling barrels.

TENNIS - A colour version of the original black and white TV game.

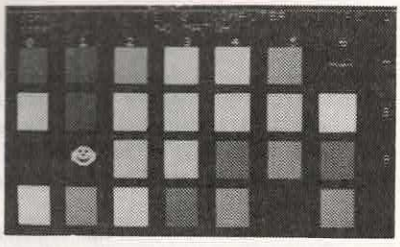

MUSICAL KEYBOARD - This program turns your computer keyboard into a musical keyboard and allows you to select note length and octave.

SVPAK3 - MSXPAK3 -

BOMBS AWAY - Destroy the targets in the ravine below. Be warned - it gets harder the more targets you hit.

BUG CATCHER - Two players move around the garden and the one with the most bugs caught - wins. Great for younger children.

SVEP1 - MSXEP1 -

COPY CAT - The computer will play a set of notes and you must play them back in sequence. There are two levels of play - one note added to the same sequence or a new sequence each time.

MEMORY - A 1 or 2 player game of memory exercise. Uncover two squares on the screen and if the objects revealed match you get another chance

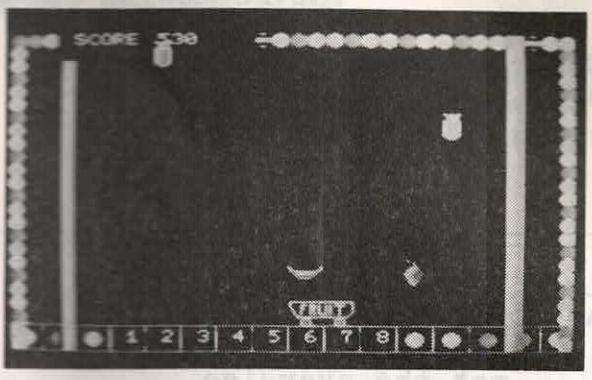

Prices include postage and packing within Australia

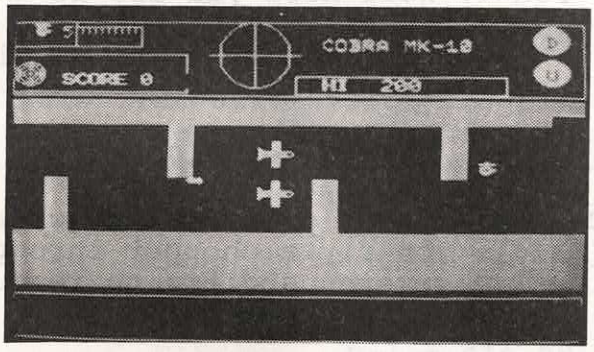

SVPAK26 - MSXPAK26 -

JUMPING COWBOY - A 'platform' game of nine screens where you must collect all the opals to get the next screen.

SUPER SMASHER - Move the bat to smash the ball through the two brick walls. Has three levels of difficulty.

FRUIT CATCHER - Catch falling fruit in your cart. As you catch more, the types of fruit will change and fall at a faster rate.

SVPAK27 - MSXPAK27 -

MIRKWOOD FOREST - Graphics adventure where you must escape from the forest by finding four keys, eating food to maintain energy, while avoiding the spiders. This one will really test your adventure gaming ability.

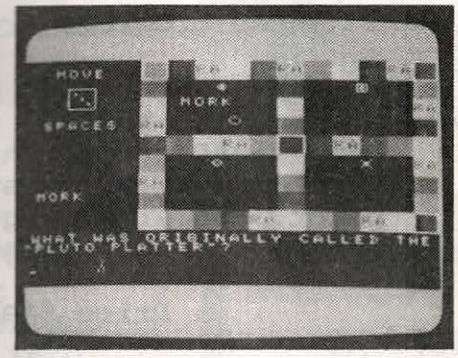

CHOPPER PILOT - The fourteen levels of this game make it very compelling. Keeping clear of canyon walls, fly your helicopter to do battle with enemy fighters, bombers, missiles and UFOs. Great skill required.

UFO (MSX ONLY)

In this machine code game, you are under attack from UFOs. Watch out for the alien unit moving across the bottom of the screen - this will fire 'smart bombs'. Watch out for the meteor shower. Refuel when the truck appears on screen.
Requires 16K RAM, has smooth scrolling, fast response with good sound effects.

METEOR SWARM (SV ONLY)

Another machine code game where your ship is caught in a meteor belt and you must blast your way out. Other ships are caught in the belt and will shoot at you if you do not destroy them first. Comes with bonus game - Birds of Orion.

SPECTRA-TRIVIA (SV 32K)
COMPU-TRIVIA (MSX)

The famous trivia game now on your computer. These are trivia quiz games for up to four players. The computer rolls the dice and each player moves in turn. At certain points you will be asked questions. There is provision for you to create your own question and answer file.

PLEASE SPECIFY SV318/328 OR MSX WITH ORDER.

THE FOLLOWING PROGRAMS ARE ALL SVI MODE

D.CUP. (SA7) Although you may never make Wimbledon you may come close with this program.

Price $5.00

HOOKEY. (SA8) This game is based on the game 101 where you must score exactly 101 to win. A game of skill

Price $4.00

GOLF. (SA9) Here is a game of golf for all you people that want the frustration but not the exercise.

Price $5.00

F.PILOT. (SA10) Maneuver your F18 on a mission of seek and destroy. And I hope you have good judgment.

Price $5.00

D.STAR. (SA11) Defend your star base against alien proton blasts A game of skill.

Price $4.00

FORM1. (SA12) Well here you are at the Australian Grand Prix, unfortunately you are in last place. Good luck.

Price $4.00

SUBATT. (SA13) You are the captain of a warship, your mission is to seek and destroy enemy submarines.

Price $5.00

CAVERN. (SA16) A game of endurance where you fly a chopper through caverns and try to rescue trapped men.

Price $7.00

These programs are made by ELECTRIC ADVENTURES

PYXIDIS. (SA14) The aliens from the planet Pyxidis are heading towards earth in their huge fleet of war ships. Earth's only hope is you, the most gifted space pilot. But are you good enough to stand up to the alien menace.

Price $19.95

MUNCH MANIA. (SA15) Move Munchie around the maze and try to avoid the ghosts, dont forget to eat the dots and collect the fruit. If you really get into trouble eat a larger dot and then, get those ghosts.
But be carefull your power only lasts a short time.

Price $14.95

MINIMUM CHARGE $12.00 : PLEASE QUOTE (SA) NUMBER WHEN ORDERING.

********** SOFT-ADDS **********

THE FOLLOWING PROGRAMS ARE ALL MSX MODE

FTYPE2. (SA1) This is a typing program which may help speed up your typing.

Price $4.00

FIND-ME. (SA2) A game where you play against the computer to find his men before he finds yours.

Price $3.00

LOTTO. (SA3) A game which chooses your numbers and puts them out to the printer or plotter or plays your game. A good program.

Price $3.00

SORT. (SA4) A small utility program that sorts out names or numbers and puts them to a printer or plotter if required.

Price 2.00

<u>These programs are made by ELECTRIC ADVENTURES</u>

PYXIDIS. (SA5) The aliens from the planet Pyxidis are heading towards earth in their huge fleet of war ships. Earth's only hope is you, the most gifted space pilot. But are you good enough to stand up to the alien menace.

Price $19.95

MUNCH MANIA. (SA6) Move Munchie around the maze and try to avoid the ghosts, dont forget to eat the dots and collect the fruit. If you really get into trouble eat a larger dot and then, get those ghosts.
But be carefull your power only lasts a short time.

Price $14.95

MINIMUM CHARGE $12.00 : PLEASE QUOTE (SA) NUMBER WHEN ORDERING.

DIAMOND MINE
by Jon May
for SVI Computers.

This is a Levels & Platforms type of game. The Instructions are in the REM'ed lines 1-5.

This programm was a winner in a contest held by SAUG, the defunct user group in Tasmania, and was suplied by Hank Zuydam, the Secretary of SUSPECT!
(Sydney Spectraviseo Users Group)
The character ▌ is the combination of the two keys "RIGHT GRAPH" + "P"

```
1 REM DIAMOND MINE by Jon May
2 REM GUIDE WILLIE AROUND THE HAUNT
ED  MINES PICKING UP AS MANY DIAMON
DS AS HECAN WITHOUT BEING CAUGHT BY
 THE GHOSTS. YOU CAN ONLY PROGRESS
ONTO THE NEXT   SCREEN WHEN ALL THE
 DIAMONDS HAVE BEEN COLLECTED.
3 'MOVE WILLIE ABOUT PLATFORMS AND
    LADDERS USING THE ARROW KEYS OR
        JOYSTICK 1. HE CAN MOVE UP
AND DOWN ON THE GREEN ELEVATORS BY
PRESSING THE    SPACEBAR OR TRIGGER
 AND PUSHING THE    JOYSTICK IN THE
 DIRECTION REQUIRED.
4 ' THERE ARE 10 DIFFERENT SCREENS.
 TO START THE GAME FROM SCREEN1, PR
ESS THE SPACEBAR. (YOU CAN ALSO USE
 THE CHEAT  FACILITY TO START FROM
ANY SCREEN BY   PRESSING THAT NUMBE
R.)
5 ' IT IS POSSIBLE TO COMPLETE THE
    WHOLE GAME WITHOUT LOSING A LIF
E.

******************************** SOFT-ADDS ***************************

THE FOLLOWING PROGRAMS ARE ALL SVI MODE

MISSION (SA17) You have 15 minutes to steal a top secret plane but first you must find a key to the plane room. Good Graphics

Price $8.00

SCORPIO. (SA18) Use the venom fired from your scorpion to kill your opponent in the deadly game of jousting.

Price $5.00

******************************** SOFT-ADDS ***************************

THE FOLLOWING PROGRAMS ARE ALL MSX MODE

AA-ZZ (SA19) A very good educational program for small children learning the alphabet. Pick a letter and it draws a little picture.

Price $5.00

ABLE. (SA20) A program that tests your knowledge of Tasmania's history as well as your sailing ability to navigate around Tasmania.

Price $3.00

FIRE PANIC

by Dan Jackson

for MSX Computers.

The Hotel is on fire. Avoid the falling FIRE BALLS by moving from side to side and build up a large score. GOOD LUCK!

```
