

SPECTRAVIDE

SPECTRAVIDEO USERS GROUP (WELLINGTON)

This is the first issue of the SPECTRAVIDEO users group of Wellington newsletter. This is a new group having had one meeting to date. For this first issue, all persons whom we have records of being SV owners in the Wellington area will receive a copy, future copies will go to subscribers only.

The aim of this club are many fold. There is though one overriding aim, for users to be able to interact with each other to learn more about their systems, and thus gain expertise in their knowledge of the system. Through this interaction, we hope that members will get more from their computer.

At our first group meeting held on June 18 we made a number of policy decisions regarding the users group. These are as follows ::

- 1) a secretary and treasurer were appointed. The secretaries role is to co-ordinate meetings and newsletters, the treasurer is responsible for all financial transactions involving the club. In general it is agreed that any decisions affecting the club would be made at club meetings by all present members.

The secretary is .. Don Stanley

work address c/- Epidemiology Unit
Wellington Hospital
phone 855999x5654 (work)
896379 (home)

and the treasurer is Colin Chin

work address P.O Box 2197
Wellington
phone 325656 (home)

- 2) Subscriptions .. we settled on a \$10 yearly charge to be used mainly for newsletter costs. There is also a \$1.00 charge to be collected at each monthly meeting to cover costs of hire of the hall and coffee and tea.
- 3) Meetings .. These will be held monthly usually on the 3rd Monday of each month. The venue is Wellington Clinical School, Staff Common Room (Level D), Mein Street, Newtown. The next meeting is scheduled for 7.30 on July 16th, the one following on August 13th at 7.30.

- 4) Newsletters .. hopefully we can get these out so members

can receive them about a week before meetings. They will generally contain a brief summary of the last meeting, a short agenda for the next, notes contributed by users about any aspect of their systems, a short tutorial on some aspect of Basic, a general question and answer section. Newsletter contributions will be gladly received by the secretary, post them (typewritten) to the above address.

Well, that briefly sums up the first meeting. The next is on July 16 at 7.30, a brief agenda is:

-- club policy -- any suggestions from users about things they would to see/not see in the club.

Question/answer time -- a chance for members to ask questions and hopefully have them answered.

-- either a guest speaker OR maybe some software reviews (user written or commercial software).

-- a chance to use computers -- show off programs (bring them on tape), assist other users with problems and so on.

Coffee/tea served at this time.

MEMBERS. The following have become paid up members. Welcome to the club John Bridson, Barry Beckett, Ross Wakelin, Barry Jones, Toby Farmer, Elliott Young, Stuart Young, Colin Chin, Don Stanley.

BASIC NOTES .. this section is intended to assist both new and old hands with some of the more useful but perhaps more obscure BASIC commands. Any contributions to this column welcome.

The ON <value> GOTO/GOSUB 11,12,13,14ln statement

This command provides a means to branch to any line (11,12,13,14 are line numbers) where the branching is dependent on the <value>.

The value is the value of a variable, or the result of some expression, it should only take integer values. String values cause a syntax error, while real numbers are truncated to integers for the purposes of the ON command. A <value> of 1 causes a branch to line number 11, a 2 to 12 and so on.

For example suppose you have a variable which takes 10 possible input values, numbered 0 to 9. We want a zero to cause a jump to 100, a one to 200 and so on. You could use the following if statement ..

```
10 a=val(input$(1))
20 IF A=0 THEN 100 ELSE IF A=1 THEN 200 ELSE
   IF A=2 THEN 300 ELSE IF A=3 THEN 400 ELSE
```

```

IF A=4 THEN 500 ELSE IF A=5 THEN 600 ELSE
IF A=6 THEN 700 ELSE IF A=7 THEN 800 ELSE
IF A=8 THEN 900 ELSE IF A=9 THEN 1000 ELSE 10
or the following ON statement:
10 a=val(input$(1))
20 on a+1 goto 100,200,300,400,500,600,700,800,900,1000
30 goto 10

```

The a+1 in the ON statement ensures that <value> ie. a+1 starts at 1.

A more complex example involves string variables. We have a program which accepts as input the letters a - f, uppercase or lowercase, and branches to a particular line number if the input is in that range, otherwise returns to the input statement. You can use ON like this ...

```

100 x$ = input$(1)
200 ch = instr("aAbBcCdDeEfF", x$)
300 on 1+(ch+1)\2 goto 100,200,300,400,500,600,700

```

The instr function returns a single value. This is the position in the first string where the second string is found. Thus if x\$ = "a" then ch will be 8, and $1+(8+1)\div 2 = 5$. The ON statement will branch to linenumber 500. If x\$ were "d", then ch would be 7, and $1+(7+1)\div 2 = 5$, so the statement is checking both upper and lower case input. If x\$ is a string outside of a-f, then ch is zero and $1+(0+1)\div 2$ is 1, the program returns to the input\$ instruction.

Programs with a lot of IF statements can often have memory requirements substantially reduced by using ON if possible, rather than IF, as ON usually requires less storage space.

GENERAL: There is a book called "Know Your Spectravideo" by Ian Sinclair due for release about July/August.

Lets hear of high games scores... send them in for any SV game.

WOW!

Besides the photos of new MSX machines appearing in the March issue of YOUR COMPUTER (eng.), there was an interesting item appearing in the April issue of "EASY HOME COMPUTER" viz.

"One development for MSX machines was the introduction of a cartridge from Yamaha. At one end of the cartridge is a magnetic reader. Pass a magnetically encoded card through the reader, and you can play songs through your computer (and presumably, programs could also be loaded through this device). Yamaha also has a 8-octave, 8-voice synthesizer attachment that reportedly simulates 50 different musical instruments and can, in effect, allow you to synthesize an entire orchestra".

from a report on the WINTER CONSUMER ELECTRONICS SHOW held at Las Vegas, back in January '84.

SPECTRAVIDEO REVIEWS

ELECTRONICS AUSTRALIA - February '84 on the 318. pages 100-104.
 BITS & BYTES - Dec/Jan issue pages 31-33, on the 318.
 COMPUTER INPUT - Feb '84, pages 9-12, on the SV318.
 YOUR COMPUTER (Eng) - Nov. '83 on the SV318. pages 77-80.
 PERSONAL COMPUTER NEWS (Eng. Weekly) - Feb. 11, pages 33-35 on the 318.
 PERSONAL COMPUTING TODAY - Mar '84, pages 33-34, on the 318.
 WHICH MICRO - Dec. '83.
 EASY HOME COMPUTER (U.S.A.) - March '84, pages 65-70, on both
 CREATIVE COMPUTING (U.S.A.) which was also reprinted in BUYERS GUIDE '84, pages 54-60.
 COMPUTER CHOICE (Eng.) March
 AUSTRALIAN PERSONAL COMPUTING
 YOUR COMPUTER (Australian)

Most of the above reviews have been sold over the counter in N.Z., and were compiled by Colin Chin who would be glad to hear of any further listings. See Colin, if you want any of these issues.

PROGRAMS only new members. We're not "newbies" and

Members will note the variation of a "bouncing ball"
listing that appeared in the June issue of BITES & BYTES.

And also an article on MSX GRAPHICS that appeared in
CREATIVE COMPUTING recently. Any other additions?

LETTER TO THE EDITOR... P.O. Box 2197

WASHINGTON

20 June 1984

The Editor
MSX-SPECTRAVIDEO NEWSLETTER

Dear Sir,

As a member looking forward to the club's future, I hope
someone will be able to instruct beginners like myself, what
MACHINE LANGUAGE is all about, especially in relationship to
the SpectraVideo.

Yours faithfully,

P.S. Also, does the club need a library of books, magazines, and
software?

Bring your SV along to meetings... come a bit earlier, say
7-7.15 to set the system up ...

ODDS;AND ENDS

Ever wondered about those two keys which seem to do ABSOLUTELY NOTHING, namely SELECT and PRINT? Well, here's the answers..

One of the SV input ports is a keyboard read data port. This port allows access to SELECT and PRINT. In fact, it allows access to 8 additional ASCII codes. This port is located at 99H.

If SELECT is pressed when port &H99 is scanning for input, then a value of &HEF is returned by the INP(&H99) command. Print returns &HDE. The following chunk of program allows you to use these keys

```
10 y=inp(&h99)
20 if y=239 then print "SELECT KEY" else if y=223 then
print "PRINT KEY"
30 else goto 10
40 end
```

I/O port &h99 allow use of other keys whether they returned ASCII codes outside the standard range ie beyond 216. These are ...

* returns 191 (numeric keypad)
CAPS LOCK returns 247
* returns 251 (numeric keypad)
* returns 239 (numeric keypad... same as select)
* returns 249 (numeric keypad)
LFL/CUT returns 251
/ returns 223 (same as print)
* returns 129 (numeric keypad)
Space Bar returns 254 and ==> returns 253

No input returns 255.

CORRECTIONS TO MANUALS

CHANGES TO

107

Second program listing needs following changes:

```

10 color 15.1.1
150 X=128:Y=96:STRIQ ON
160 Put SPRITE 1. (X,Y).9.1
170 D=STICK (0)
180 F=STICK (0) STRIQ (0)
190 REM (as previous 180)
200 If F<7) THEN GOSUB 460
210 If D=1 THEN X=X:Y=Y-1
220 If D=2 THEN X=X+1:Y=Y-1
230 If D=3 then X=X+1:Y=Y
240 If D=4 THEN X=X+1:Y=Y-1
250 If D=5 THEN X=X:Y=Y+1
260 If D=6 THEN X=X-1:Y=Y+1
270 If D=7 THEN X=X-1:Y=Y
280 If D=8 THEN X=X-1:Y=Y-1

SPECTRAVIDEO

You know how easy it is to program on the SPECTRAVIDEO personal computer, don't you?

You know also that the Spectraideo has excellent sound and graphics?!

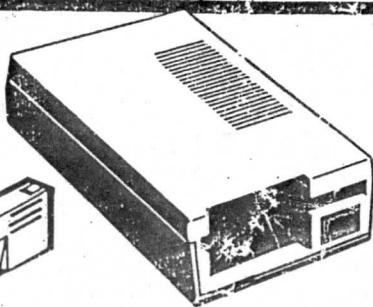

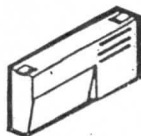

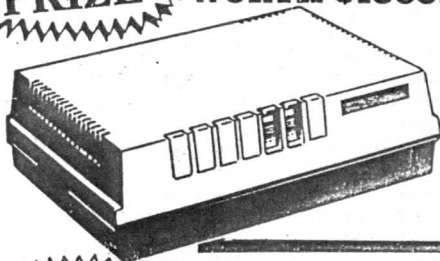

To encourage you to find out more about the system and to write your own programs, we are running a:

SOFTWARE COMPETITION

FIRST PRIZE

SV601 Spectraideo Super Expander
SV801 Spectraideo Disk Controller card
SV902 Spectraideo Disk Drive

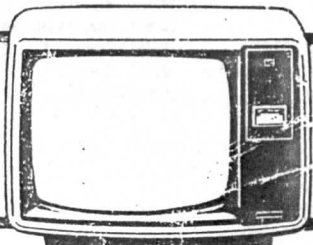

WORTH \$1365.00

SECOND PRIZE

Kaga 12" Green Screen Monitor with daylight screen

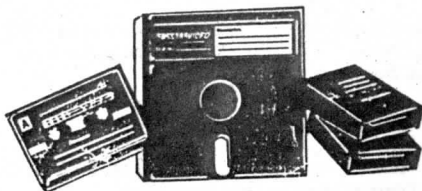

WORTH \$299.00

THIRD, FORTH & FIFTH PRIZES

Software Packages consisting of four programs: Armoured Assault, Home Economist, Spectron and Introduction to Basic.

WORTH \$72.00 EACH!

CONDITIONS

- * Software must be received by Computer Distributors Ltd no later than 31st July 1984.
- * Software must be accompanied by clearly written instructions, full postal or contact address of the entrant.
- * Cassettes or disks must bear the name of the program as well as entrant's name and address.
- * All types of software is eligible for entry. e.g. Games, Utility, Simulation, Business etc.
- * Computer Distributors Ltd reserves the right to become exclusive publishers of the software entered.
