

WELLINGTON SV GROUP NEWSMEMO JANUARY 1988

You will have already noticed that this January memo is not up to the usual high standard set by our normal editor in chief.

Steve is unable to get together a January newsletter hence this short note from your chairman.

Firstly, for the benefit of those fortunate local folk we will be meeting as usual at 7.30pm in the Newlands Intermediate school staff room on the 15th of February.

Since this is the first newsletter (or more rightly newsmemo) for 1988 I feel I should possibly set the scene for the new year.

It does not take a genius to realise that our users group like many others is destined to fade away as our membership and support dwindle. The SV 318 / 328 computers have long since been replaced by newer models of computer offering new, but to my mind not always good features. The IBM PC and the host of compatibles has really changed the computer scene for ever, the 8 bit machines like ours are a thing of the past in the eyes of some.

I believe however that the machines we support are still admirably suitable for many uses. Quite a few of our members (me included) use more powerful computers in our workplace. My SV 328 is just as good as the ones I use for wordprocessing or Basic FOR MY NEEDS. It may be nice to have extra speed or memory but how often is this required at home ?

I personally, will be letting a bit more water go under the proverbial bridge before going to an Alpha or Beta or whatever.

The SVUG Wellington intends to go on just as long as we can, but I don't need to tell you that YOUR input is ESSENTIAL. We would like to hear more from the out of town members who mainly benefit by our newsletter.

We intend to include in our next newsletter the following :

DO YOU REALLY NEED A CLONE ? By Don Rogers

BENCH MARK TEST OF IBM vs SV 328. By J.A.Oliver

A PRINT SCREEN BUTTON FOR SV 328

GAMES , SYSGEN INFO AND A NEW SOURCE OF PROGRAMES.

Plus much more
