LETTER FROM JAPAN:-

We are pleased to announce the arrival of the NEW 16 bit fully MSX compatible PANASONIC FS-A1ST MSX R TURBO the first of the new MSX computer generation to be released here in JAPAN.

The heart of it is the sensational new R800 processor, which is approx 5 times faster than the Z80A. The RAM memory has been extended to 256K, with MSXDOS 2 built in at no extra cost. The sound has also been improved by the addition of PCM functions.

This MSX super computer will be available from NOVEMBER 1990.

EDS COMMENTS:-

This certainly seems to be a "SUPER COMPUTER", in fact it is 3 computers rolled into one, MSX 1, MSX2, & possibly MSX 3, especially with MSXDOS 2 built in which costs \$400-00 on its own.

The price is reasonable too at 109,750 YEN which includes insurance & airfreight from JAPAN. Depending on the rate of exchange at the particular time this roughly converts to \$A:1097.00, not forgetting the the 22%-25% customs duty SLUG to be added on top. Which would make it around \$A1350-00, still a cheap computer when compared with whats on the market today.

The pity is that it is very unlikely that PANASONIC will release a model for sale In AUSSIE, so we will have to try & convince one of our more affluent local members to purchase one, to enable us to try out some of the programs on the 90 discs we have suitable for this machine.
