
RESCUE™

Introduction

You are welcome brave soldier! This difficult mission has been assigned to you, and you only! Many heroes have failed on this difficult enterprise. You are our last chance to rescue our brave men trapped in enemy territory. We realise that this mission is hard, it is going to be tough, very tough for you. But with your proven skills of flying helicopters, your keen eye and judgement, as well as your nerves of steel and your daring, we know that you can do it! Go in there and bring out those men safely! But remember! The enemy will do all in their power to stop you. Show them your courage! Show them your bravery! Go and do it!.....Good luck!!!

Getting Started

1. Hook up your computer to TV or monitor. Also connect cassette player to computer.

2. Turn all units on.

3. Insert tape. Rewind fully. Type:

   cload ENTER

   Wait till the followings appear:

   Found: RESCUE
   Ok

4. Press F5 to run the program. Follow the insturctions on the screen. Also refer to this instruction manual for details.

Tips on Handling and Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snuggly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.

Game Description

Three of our brave soldiers were sent into enemy territory over a month ago. Their mission, is to get vital information about the enemies' war plans.

They managed to get the information but were discovered by the enemy! After a long and dangerous chase they eventually escaped to the mountains. But they have now become stuck on a high ledge. Two days ago they managed to radio for help.

So, your job is to rescue these three brave men!!

The only way they can be rescued is to air lift them out of this dangerous, rugged mountainous region by helicopter. You will be the pilot set to accomplish this hazardous mission! There is no other way to reach them. They are stuck on a precipitous ledge high up in the mountain ranges. The enemy knows that they are there, but has no need to fear them. They have become so weakened by hunger and exhaustion.

You must rescue them before they die of exposure!! You are their only chance!!!

Ah! Ha! But the enemy knows that we will try to rescue our men. They are cunning devils! They know that our men have copies of important information about their plans to attack our country. It is vital that this information is delivered to us! But the enemy is going to try to stop you from resuing these men. All along your air route they will be firing shells at you on both your forward and return journeys. Not only that! You have to avoid some very severe obstacles on your way, the murderous looking mountain range and the tall aerial mast. No one say it would be easy!!

Unforturnately your task has been made even more difficult. We can only provide you with the small two man helicopters. This means that you can only bring one man over at a time!! You will have to make three forward and return journeys. But we can give you six helicopters. So you have six chances to get those men back to safety in the home base.

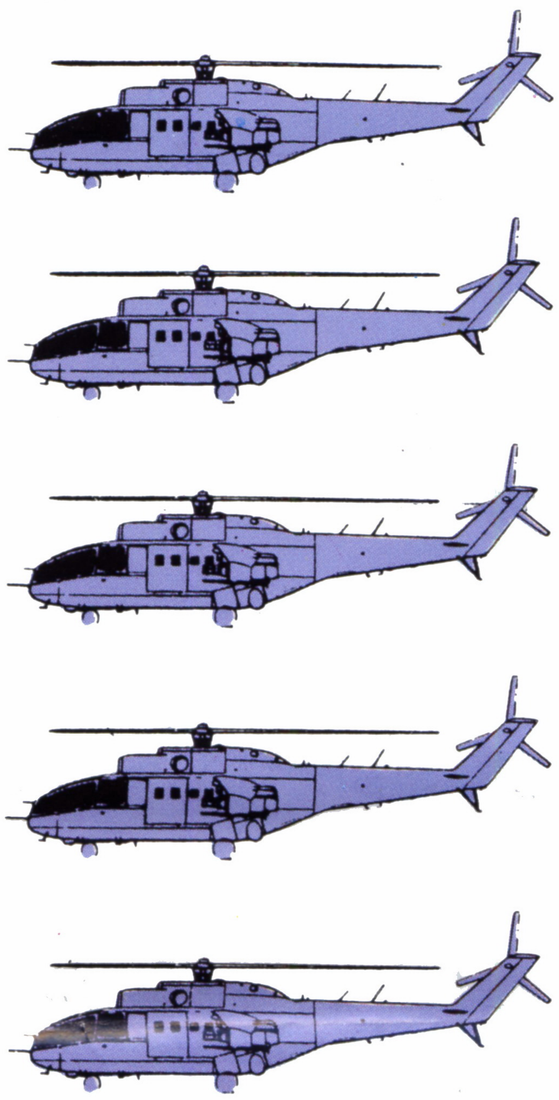
As soon as you have completed your first forward journey the enemy will realise that you mean business. He will keep those shells coming quicker and quicker. The more successful you are the more dangerous each forward and return journey becomes.

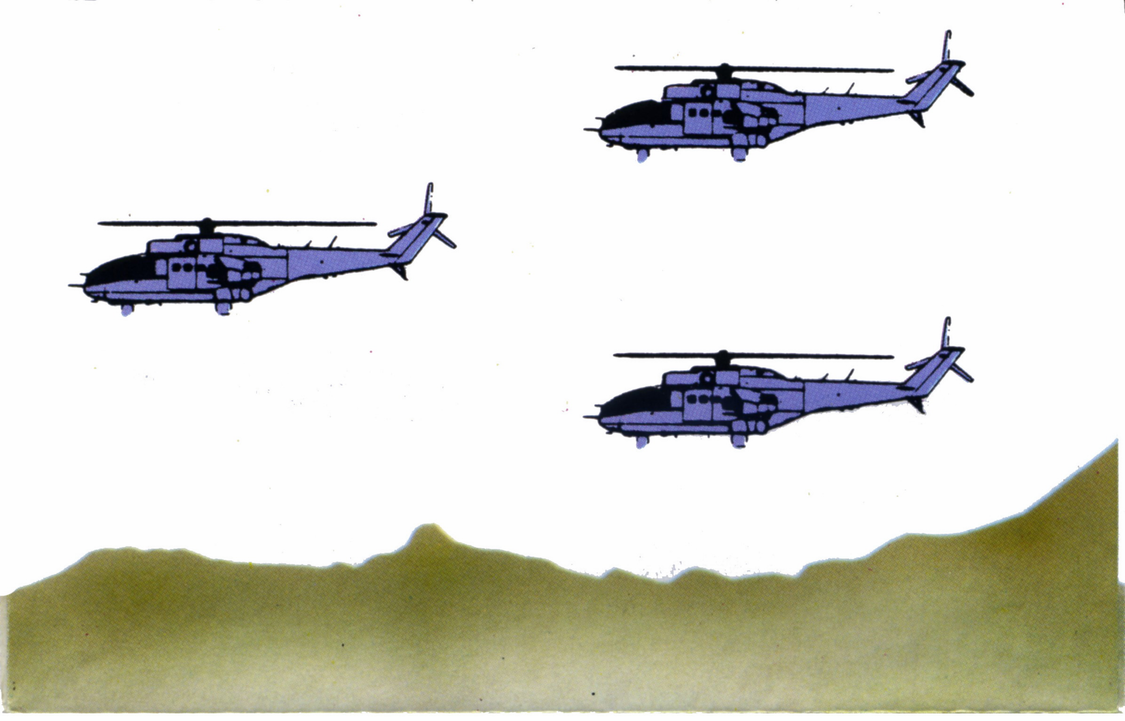
We must have all three men back alive!. If any one of them is shot down we will have lost a vital piece of information, as well as a good soldier. Only when they are together can these three men give us the accurate plans of the enemies' proposed attack on our beautiful country.

The country is behind you soldier! Go to it!!! Rescue those men! Bring them safely home!

Objective

To rescue the three men trapped on the left hand side of the mountain. Rescue them by flying your helicopter over the dark green mountains and the aerial mast. But be careful! The enemy is out there waiting to shoot you down!!





Instructions

The first page that is shown on this program gives you brief instructions about the aim of the game. For more complex and detailed instructions read the following carefully.

The helicopter is controlled by the use of either the cursor control keys or the external joysticks.

The first page of the program will give you the option of using the cursor control or the joystick.

To use cursor control press key [0]
To use external joystick press key [1]

Having made this decision the program will then ask you at which skill level you would like to play. You have a choice of 3 levels: easy, average and difficult. Press the following keys for your choice:-

Levle 1: Easy = Key [1]
Level 2: Average = Key [2]
Level 3: Difficult = Key [3]

(For description of skill level see section at the end of the instructions)

For control of loading or unloading the men onto or off the helicopter at each side of the screen, press either the space bar or the fire button on the joystick.

Now you are ready to play.

SPECTRAVIDEO SOFTWARE AND ACCESSORIES LIMITED 90-DAY WARRANTY

SPECTRAVIDEO warrants to the original purchaser that the SPECTRAVIDEO software is free of defects in material and workmanship for a period of 90 days from the date of purchase. SPECTRAVIDEO agrees to either repair or replace, at its option, free of charge, any software discovered to be defective within the warranty period upon receipt of the software, postage paid, with proof of date of purchase, at its Factory Service Center

This warranty is limited to the electronic circuitry and mechanical parts originally provided by SPECTRAVIDEO and is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the software has arisen through abuse, unreasonable use, mistreatment or neglect. This warranty is in lieu of all other express warranties and no other representation or claims of any nature shall be binding on or obligate SPECTRAVIDEO. **Any implied Warranties applicable to this software are limited to the 90 days period described above. In no event will SPECTRAVIDEO be liable for any special, incidental, or consequential damage resulting from possession, use or malfunction of this software.**

Some states do not allow limitations on how long an implied warranty lasts and/or the exclusion or limitation of incidental or consequential damages so the above limitations and/or exclusion or limitation of liability may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state

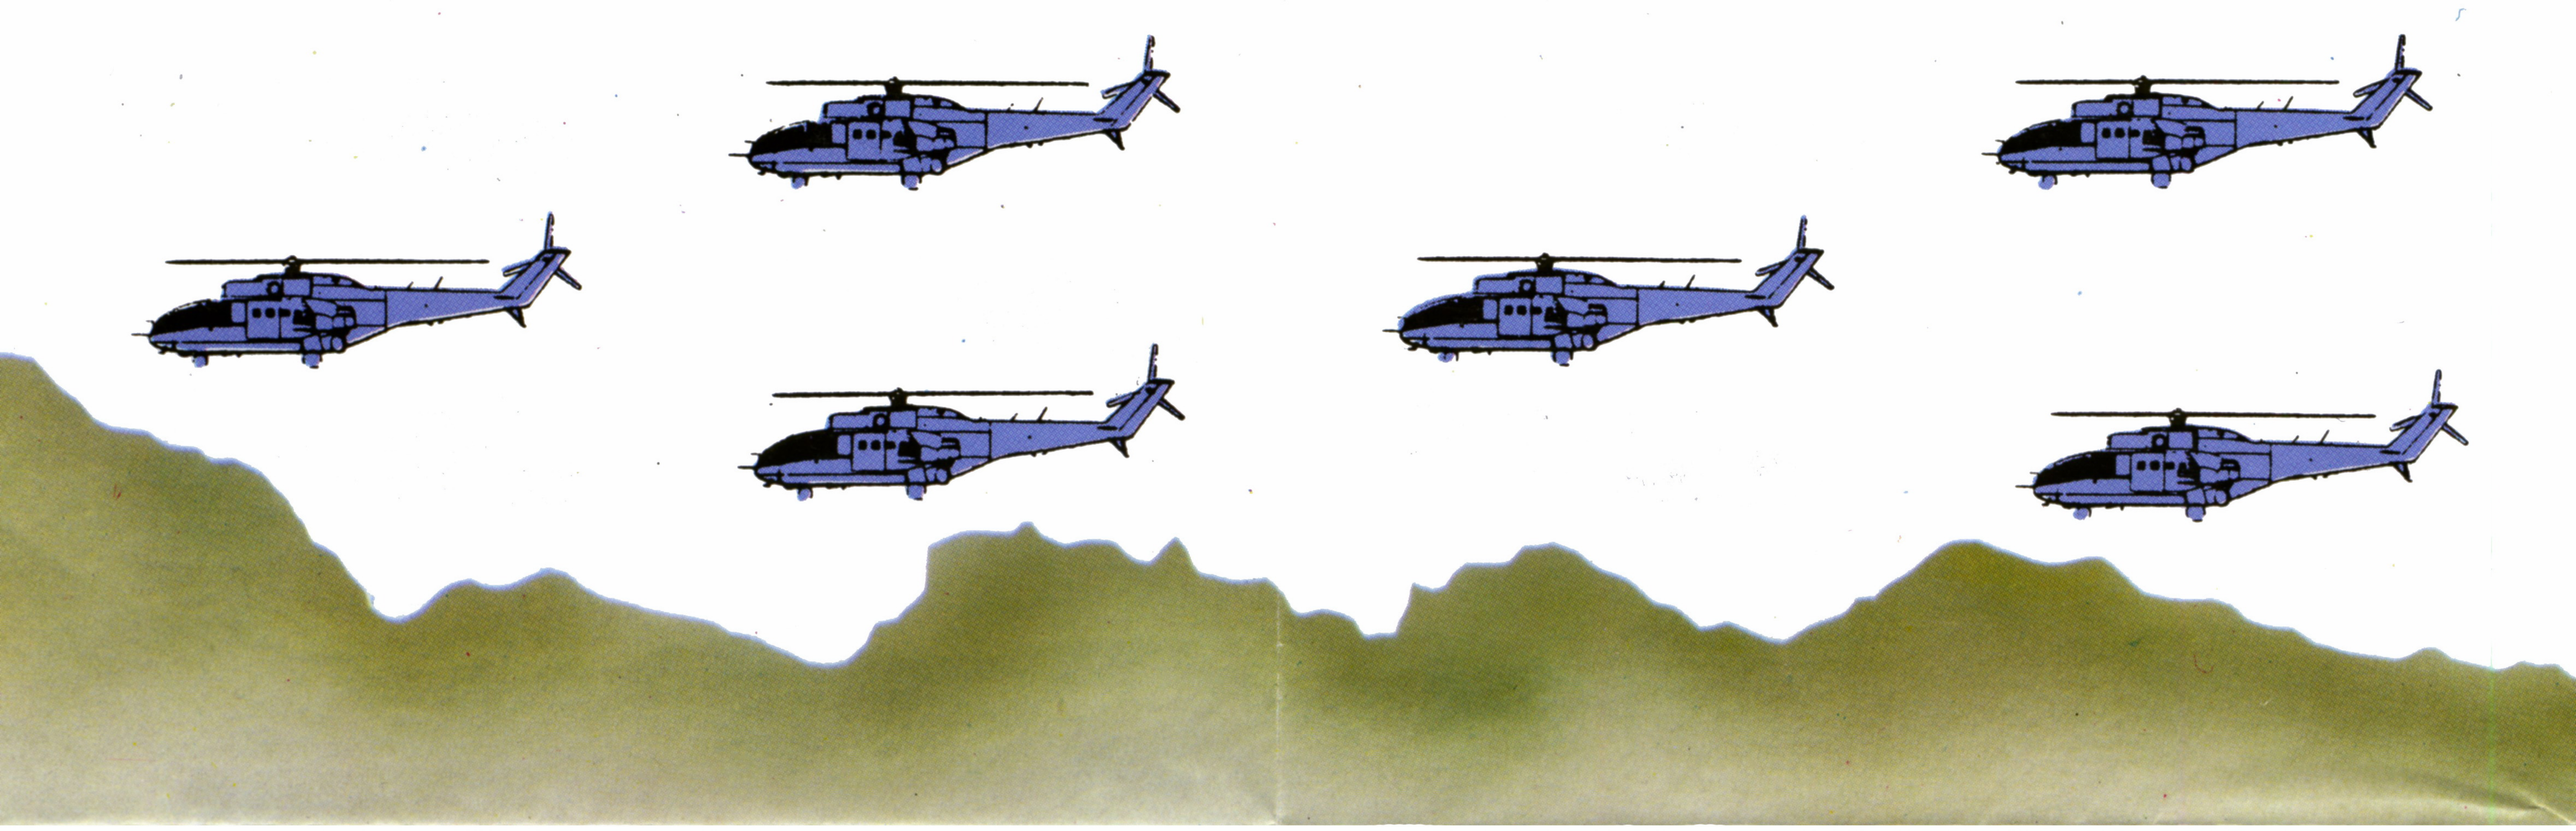
Every effort has been made to supply complete and accurate information in this manual. Spectravideo International Ltd. reserves the right to change Technical Specifications and Characteristics at any time without notice.

No part of this publication may be stored in a retrieval system, transmitted, or reproduced in any way, including but not limited to photocopy, photograph, magnetic or other record, without the prior agreement and permission from Spectravideo International Ltd.



The aim of the game is to bring the three men trapped on the left side of the mountain home to the right side, one by one. However, to do this the helicopter has to avoid several obstacles. It has to avoid the dark green mountain range, the high aerial mast and the deadly shells that the enemy is continually firing into the air. They are determined to stop you from rescuing those men! If the helicopter hits any of these obstacles or is hit by an enemy shell it will be instantly destroyed, and bursts into flames.

In each round of the game there are altogether six helicopters that can be used. These are situated on the right side of the screen. One is already standing in position on the red helicopter base ready for take off. While the other five are lined up, waiting to be used.

On the other side of the mountain, on the left of the screen, the three men have been trapped by the enemy. They are waiting to be rescued by you and air lifted away to safety in your helicopters.

You have six chances of rescuing them. However, if the helicopter gets shot down or crashes on its return journey when it has one of the men on board, the game will be effectively over. This means that although you can finish the game, you will not automatically continue on to the next page when it is completed. You will return to the same page at the same skill level until you have successfully completed it by getting all three of the men safely back to base.

To start the game lift the helicopter from the landing pad and prepare to fly over and through the obstacles.

Fly the helicopter over to the other side of the screen. Dodge the enemy shells and avoid crashing into the aerial mast and the dark green mountains.

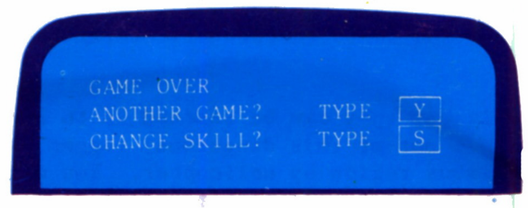
Land carefully on the other side and take on board one of the trapped men. Press the space bar or the fire button to load him into the helicopter.

Now, fly back to the right side with your man, again avoiding the shells and the other obstacles.

Land carefully and unload your man, using the same procedure as for loading. Return to collect the second trapped man and then make another trip for the third man.

Remember that you have six helicopters to fly, but only three men to bring back to base. If you crash with one of the men on the return journey the game is effectively over, although you can continue to practice, you will not continue to the next page.

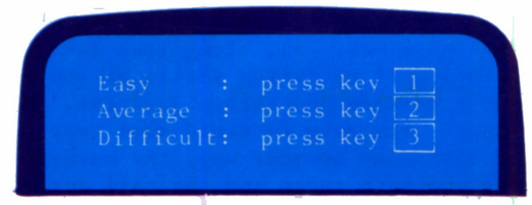
When you have successfully completed a game the following options will appear on your screen.



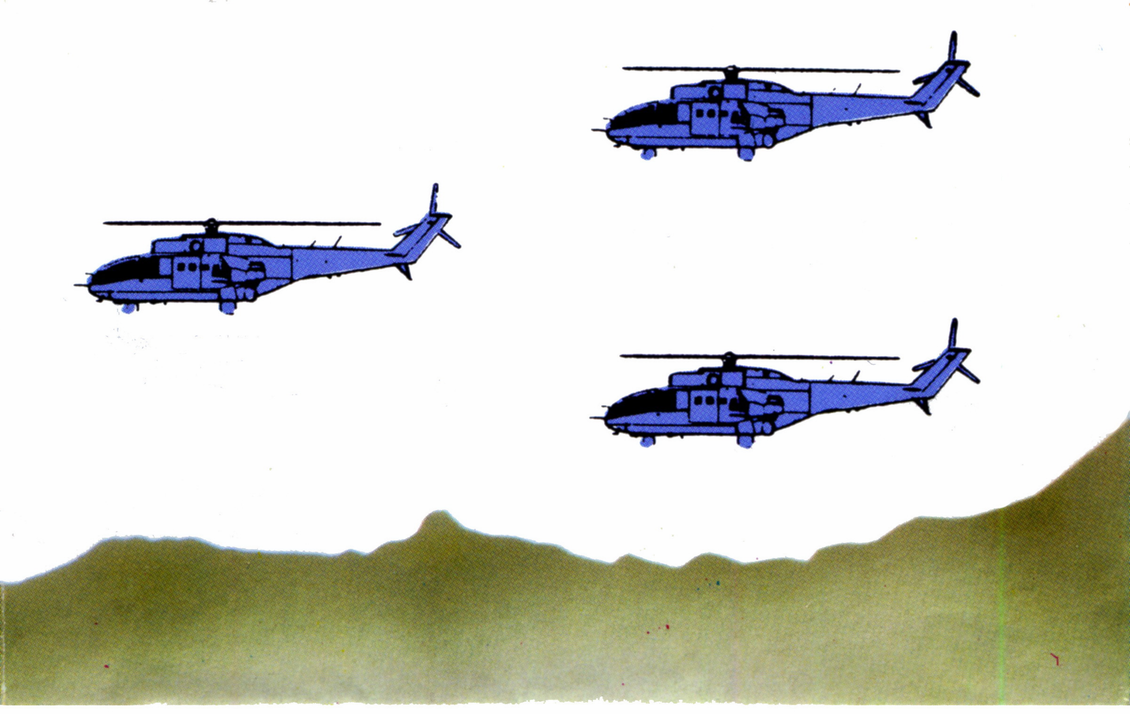
If you wish to continue playing the program at the same level you press the key [Y]. Type key [S] if you want to change your skill level of play.

Skill Level

You will have three choice of keys



As the skill level is raised the enemies shells are fired at a much, much higher speed. At each level it becomes very much harder to fly the helicopter safely to the other side. Do you think you can make it? It's a real challenge!



Scoring

The scoring is different for each skill level, and for each page of the game within the course. So the more you play and the higher your skill level is the higher your final score will be.

Level 1 - Easy

Page 1		
Forward journey	30	points
Return journey	50	points
Page 2		
Forward journey	40	points
Return journey	70	points
Page 3		
Forward journey	60	points
Return journey	100	points

Level 2 - Average

Page 1		
Forward journey	40	points
Return journey	70	points

Level 3 - Difficult

Page 1		
Forward journey	60	points
Return journey	100	points

Your score will appear at the top right corner of the screen in the box every time that you successfully complete either your forward or your return journey.

In case of Difficulties

1. As the program is in progress, and the computer hangs up, press [CTRL] and [STOP] keys simultaneously. When the "Ok" prompt is displayed, press [F5] to run the game.

2. Turn off power to all equipment and check all connecting cables.

   Rewind tape and try again.

   Type **cload** followed by [ENTER]
   When the "Ok" promt is displayed, press [F5] to run the game.
