- Tips on Handling and Storage
1. Avoid touching the tape with your fingers. You may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reels. If the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.

4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near hearing appliances, TV sets or similar equipment.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.

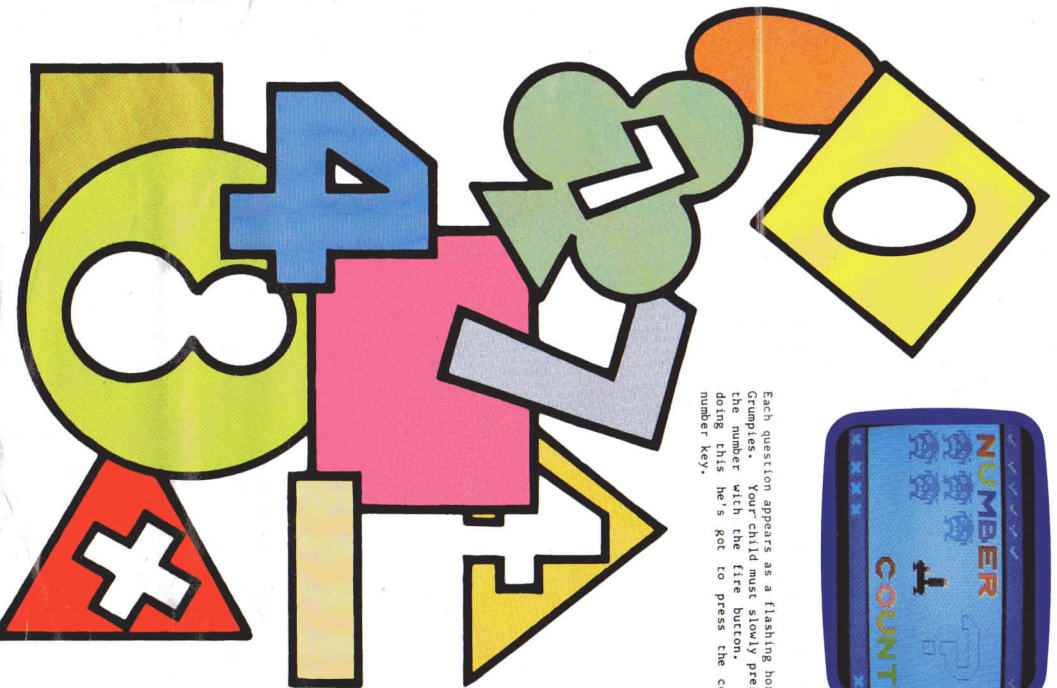

The shape to be matched appears within a flashing circle in the upper right and lower left corners of the screen. Your child must aim at and shoot the correct answer with the joystick.

To aim: Move the hand grip of joystick to the desired direction.

To shoot: Press either fire button 1 or 2.

Each question appears as a flashing horde of Grumpies. Your child must slowly press out the number with the fire button. After doing this he's got to press the correct number key.
