

GETTING STARTED

1. Hook up your SV-318/328 to a TV or monitor.
2. Connect Spectravideo's SV-903 Stereo Data Cassette. The provided cable plugs directly from the Data Cassette into the small port on the back of the SV-318/328 computer.
3. Turn on the computer and TV or monitor.
4. When the "OK" prompt and square cursor appear on the screen (takes about 4 seconds), type in CLOAD.
5. Insert game cassette and close the cover.
6. Make sure tape is fully rewound to the beginning.
7. Press "ENTER" key on the computer. The computer will then prompt you to press the play button on the Data Cassette. When the "OK" prompt returns, type "RUN" and then "ENTER" and the game option screen will appear. Choose the game mode you desire.
8. "Take-A-Break" feature—You can put the game on hold if you press the "ESCAPE" key on your SV-318/328. The game will then hold at that point until you've gotten your snack out of the refrigerator (or whatever). Press the ESCAPE key again to resume the action.
9. Restart — game already in progress. If, during the game, you decide to start all over again press the "CONTROL" and "STOP" keys simultaneously.
10. Restart — game over. Press any key on the computer to restart the game when "Game Over" indicator appears on the screen.

- Tips on Handling and Storage**
1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
 2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
 3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
 4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
 5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
 6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.

EYEBALL TO EYEBALL

BRIEF DESCRIPTION OF GAME: With ARMoured ASSAULT, it's you against a real live opponent — head to head, face to face, eyeball to eyeball! Because of the suspense and immediacy, ARMoured ASSAULT makes many other video games seem tame.

This fast-paced war game takes place in a maze, where danger lurks around every corner. You must keep your guard up every second, continually outmaneuvering and outthinking your opponent (who, remember, is sitting right there next to you!). Both sides — the "Yellow" and the "Green" — start with an equal amount of tanks, armaments (rockets) and fuel. The quantity of these supplies depends on the game level selected, and different levels require different strategies for "taking out" your opponent. These various battle tactics will be described as we go along.

SPECIFIC GAME OBJECTIVE Unlike horseshoes and hand grenades, close doesn't count in ARMoured ASSAULT. There is only victory or defeat, honor or shame, life or death! So the game objective is very simple: Destroy your opponent before he destroys you.

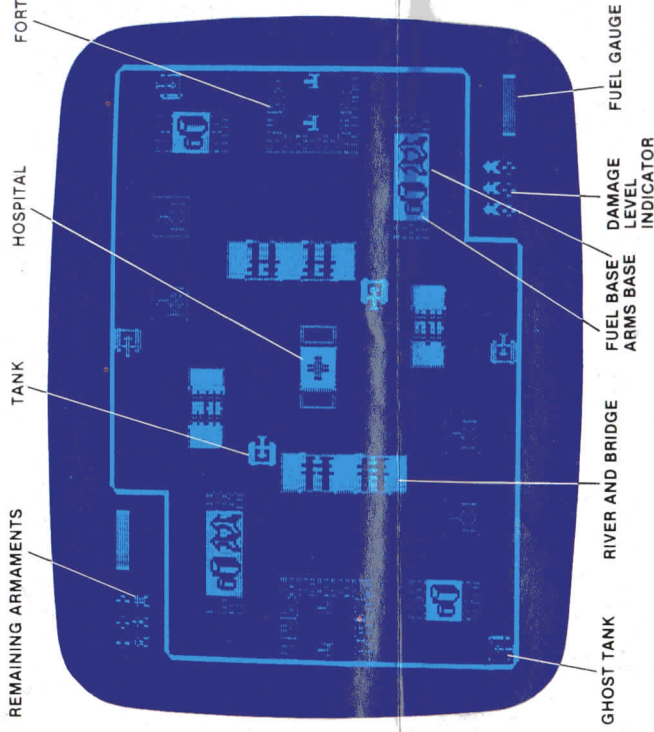

END OF GAME The game ends when one player destroys either all the tanks or the home fort of his or her opponent. In either case, a big explosion will occur, and the screen will flash with the color of the losing side.

ATTACK!

CONTROLLING THE ACTION All action is joystick-controlled. To move your tank up, down, left or right, just move your joystick in the corresponding direction.

Player 1 is the "Green" side, and uses either the built-in keyboard joystick or joystick 1 (as marked on the side of the computer). Player 2 will be the "Yellow" side, and will use joystick 2. To fire a rocket at any time, just press the button on your joystick controller.

PANEL INDICATORS & BATTLE TACTICS Please see the accompanying diagrams to understand the various indicators and objects that appear on the screen in ARMoured ASSAULT. Some appear all the time (fixed) while others appear only sometimes.

DAMAGE LEVEL INDICATOR This symbol indicates the damage level of a tank. Whenever a tank has been hit twice, this cross will appear as a warning. If a tank is hit six times, it will be destroyed.

REMAINING ARMAMENTS indicates the number of rocket you have left. (The number you begin with depends upon the game mode you are in.) When all the rockets are gone, the tank will be destroyed.

SPECTRAVIDEO SOFTWARE AND ACCESSORIES LIMITED 90-DAY WARRANTY

SPECTRAVIDEO warrants to the original purchaser that the SPECTRAVIDEO software is free of defects in material and workmanship for a period of 90 days from the date of purchase. SPECTRAVIDEO agrees to either repair or replace, at its option, free of charge, any software discovered to be defective within the period of the warranty. The cost of the software, postage paid, with proof of date of purchase, at its Factory Service Center.

This warranty is limited to the electronic circuitry and mechanical parts originally provided by SPECTRAVIDEO and is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the software has arisen through abuse, unreasonable use, mistreatment or

neglect. This warranty is in lieu of all other express warranties and does not constitute an acceptance of liability for binding on or obligate SPECTRAVIDEO. Any limited warranties applicable to this software are limited to the 90 days period described above. In no event will SPECTRAVIDEO be liable for any special, incidental, or consequential damage resulting from possession, use or malfunction of this software.

Some states do not allow limitations on how long an implied warranty lasts and/or the exclusion or limitation of incidental or consequential damages so the above limitations and/or exclusion or limitation of liability may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

GAME MODES The 8 different game modes possible in **ARMoured ASSAULT** vary the action and make the game even more exciting and unpredictable. A complete explanation of the different modes can be found in the accompanying chart.

1	2	3	4	5	6	7	8
12	24	24	12	24	24	12	12
S	L	L	S	S	L	L	S
5	3	5	3	5	3	5	3
Y	N	N	Y	Y	N	N	Y
N	Y	N	Y	N	Y	N	Y
N	N	N	N	Y	Y	Y	Y
NO. OF ROCKET							
FUEL S-SHORT SUPPLY L-LONG SUPPLY							
NO. OF TANKS							
FUEL & ARMS BASE N-NO Y-YES							
HOSPITAL							
GHOST TANKS							

In levels 5 to 8, "ghost tanks" may be released from the bases. As the name would indicate, these are the ghosts of warriors now long gone, and since they are already dead, they cannot be destroyed... no matter what you do!!! That is why they can be so devastating. But obviously, you can use them to your advantage, too, since they can just as well appear on the Green side as the Yellow side.

RIVER AND BRIDGE

SCORING AND AWARDS

The scoring is very simple in **ARMoured ASSAULT**, therefore the awards are very simple, too.

AWARD NO. 1WINNER
AWARD NO. 2LOSER

(There is no in between!)

FUEL GAUGE This indicator shows you how much fuel you have left. If your fuel gets all used up, your tank will self-destruct! Luckily, fuel bases are provided for your convenience.

THE TANK These show you how many tanks you have left. How many you start with depends on what game mode you are in. Each one of these symbols represents one tank.

THE HOSPITAL If available in the game mode you are in, you can drive into the hospital to have your tank repaired.

THE RIVER AND BRIDGE These are for hiding purposes only.

THE FORT There are two forts: One Green and one Yellow for the two sides competing. You must protect your fort at all costs, because loss of it will mean your defeat! At the same time, you must try to wipe out your opponents fort (a fast way for you to win the game). Although the fort is well fortified with bricks, it *can* be penetrated. After 8 rocket hits, you will break a hole in the fort. After that, a direct hit inside the fort will destroy it (ending the game in your favor). This is challenging, and you must all the time watch how many armaments you have left.

THE FUEL BASE This is where you refuel, but you can only do so by entering a base that matches your color. At the same time, your goal is to blow up your *opponent's* fuel base. By hitting the bricks that surround the base 4 separate times, you will destroy it.

THE ARMS BASE This is where you can get a new supply of armaments. The method of destroying an opponent's Arms Base is the same as with the Fuel Base.
