

Why not learn BASIC by playing games! With the Spectravideo Tutorial Program you will learn advanced BASIC techniques that are at the heart of the Spectravideo computer.

The powerful graphic and sound commands on the Spectravideo computer surpass those of personal computers costing 3 times as much. So why not have fun as you progress in your study of BASIC, the easy way

Tips on Handling Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reel. If the tape is ever a little loose, carefully tighten it by gently turning one of the hubs (a pencil is often helpful for this).
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
5. Avoid prolonged exposure of cassette to excessive heat (such as direct sunlight); avoid exposure to strong magnetic fields. Do not store near heating appliances, TV sets or similar appliances.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.
