- Game mode selection page has 6 game modes, as the following chart shows. To select the mode you want, press the computer key number that corresponds to the mode.

- | |
|-----------------|
| I. PLAYER |
| 1 PRACTICE ONLY |
| 2 NORMAL PLAY |
| 3 ARCADE LEVEL |
| II. PLAYER |
| 4 PRACTICE ONLY |
| 5 NORMAL PLAY |
| 6 ARCADE LEVEL |

If the player select 4, 5 or 6 then the following message will be displayed.

- | |
|-----------------|
| II. PLAYERS |
| 1 ONE JOYSTICK |
| 2 TWO JOYSTICKS |

Press 2 only when you have two joysticks. However, after you have made your selection, you cannot change it unless you turn off the computer and restart again.

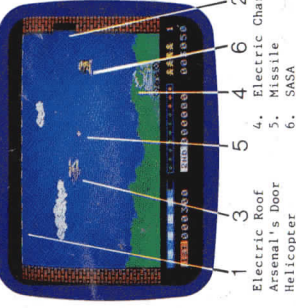

- If during a game, one decides to start all over again, press **CTRL** + **STOP** keys simultaneously, then game will start from page of game selection mode again.
- Press any key to restart game when game over page is shown.

SASA is basically a one player shooting game with four pages. The main character is a robot named SASA, who has been assigned to complete a mission. The mission requires SASA to obtain enough energy to fight with Astro-Monsters in an Astro-Ring.

He is armed with a gun with limited number of bullets. However, when running short of

- Charge Indicator: Indicate number of recharge for each SASA.
- Bullet Indicator: of bullet still available.
- SASA Count: Indicate number of SASA remaining.

- Tips on Handling and Storage
- Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
 - Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
 - The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
 - Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
 - Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
 - To preserve valuable or prized recordings, "punch out" and remove the erasure prevention lug on the top edge of the cassette.

- Skill Level Indicator: Indicate the current skill level.

- Scores: Both players' scores and the current player's high score are shown. Score for the current player is highlighted in red.

- Sky Page

The objective of this page is to demolish the arsenal's door. This can be done by shooting at the door until one bullet goes through it, and their collision with helicopters and their missiles will cause fatal damage to SASA. When bullets are getting less, SASA can be recharged from the recharging tank. However he must do this carefully since energy can only be obtained if he drops himself on the charge source accurately. Otherwise, he will be hurt by the recharging tank. Notice that SASA drops due to gravity.

- Charge Indicator: Indicate number of recharge for each SASA.
- Bullet Indicator: of bullet still available.
- SASA Count: Indicate number of SASA remaining.

SPECTRAVIDEO SOFTWARE AND ACCESSORIES LIMITED 90-DAY WARRANTY

SPECTRAVIDEO warrants to the original purchaser that the SPECTRAVIDEO software is free of defects in material and workmanship for a period of 90 days from the date of purchase. SPECTRAVIDEO agrees to either repair or replace at its option, free of charge, any software discovered to be defective within the warranty period upon receipt of the software postage paid, with proof of date of purchase, at its Factory Service Center.

2. Arsenal Page

After the arsenal's door is opened, SASA enters the arsenal and tries to shoot the power generators. These generators are protected by flying saucers. They chase and capture any enemy who enters the arsenal. SASA has to dodge or destroy these flying saucers in order to protect himself. Whenever a flying saucer is shot, certain electric energy will be released to recharge SASA when he passes by.

1. Flying Saucer
2. Power Generator
3. Flying Saucer Room

Remarks: (1) Flying saucers come from green flying saucer room.

- (2) Blue flying saucers cannot be destroyed. Shooting at them only slows down their speed.

3. Sea Page

In this page SASA shoots the octopi which has swallowed energy bottles. The octopi move up and down swimming in illusive paths. Moreover, they usually carry ink drops with them. Both the octopi and ink drops are harmful to SASA. When the octopus is shot, the energy bottle will float away slowly. Therefore SASA should move to the bottle and pick it up. Picking up five bottles will finish this page. The recharging source for SASA in this

5. Game Over

Game over for a player when there is no more SASA left.

1. Recharging Ship
2. Octopus
3. Ink Drop

Remarks: Color of recharging ship changes to show number of energy bottles being picked up.

4. Astro Page

This is the last stage of SASA's mission. Astro-Monsters from different directions enter the Astro-Ring. They move towards SASA and SASA has to fight with them. Groups of Astro-Beattles appear periodically. They fly across the ring in illusive paths. SASA should stay in the ring until the fourth group of Astro-Beattles has passed away. SASA has unlimited bullets and charge in this page.

Astro-Beattle

The player can start from skill level 1, 2, 3 or 4, according to the instruction shown in the selection page. Whenever he finished every four pages, he will move up to a higher level. For example if he starts at level 3, then he will move up to level 4 when he completes all four pages in level 3. Similarly, if he completes all pages in level 4, then he can play level 5.

In this game, the game play is the same for different skill levels. Each skill level differs from the higher one according to the following criteria:

1. Increasing appearing frequency of helicopters, flying saucers, octopi and Astro-Monsters in page 1, 2, 3 and 4 respectively.
2. Higher intelligence of missiles launched by helicopters.
3. Higher intelligence and speed of Astro-Monsters.
4. Range of illusive action of octopi and Astro-Beattles becomes more complex.
5. Maximum number of enemies appear simultaneously on screen. This is shown in the following table.

No. of Helicopters	Practice Level	Other Levels
No. of Flying Saucers	2	0
No. of Blue Flying Saucers	1	1
No. of Octopi	1	2
No. of Astro-Monsters	4	4
Helicopters' Missile	0	2

Remarks: (1) The appearing frequency of Astro-Beattles are the same for different levels.

- (2) SASA drops slowly in Sky Page for practice level.

Both player 1 and player 2 can use joystick or the keyboard cursor key. If two joysticks are used for two players then player 1 uses joystick 1 and player 2 uses joystick 2.

Unless SASA is touching the ground, moving the joystick only faces SASA to different directions. SASA moves due to the reaction of its shots. For example if SASA is dropping and the player wants to move it up again. He should first move the joystick down so that SASA will face downward. Then

he should press the fire button to shoot downward. The reaction of shots will push SASA up. However, when SASA is on the ground it walks left and right according to joystick signal.

- Shoot down a missile 50
- Shoot down a helicopter 50
- Shoot down a green flying saucer 50
- Kill an octopus 50
- Smash an ink drop 50
- Kill an Astro-Monster 50

- Shoot a bullet on arsenal's door 100
- Let a missile collide with a helicopter 100

- Kill an Astro-Beattle 300
- Damage a power generator in arsenal 800
- Pick up an energy bottle 800

An extra SASA will be given for finishing every 4 pages (move to a higher level) unless the player already has 6.

1. Sky Page

The main task in successfully going through this page and other three pages is keeping SASA in advantageous position to obtain its objective. In page 1, SASA has to shoot through the wall therefore the player should place SASA about one and a half inches away from the door and try to shoot at the same position of the door.

2. Arsenal Page

In this page the player has to get use to the technique of shooting SASA up and change his direction while he is in the air. Also this page differs from the first page in that it combines walking with shooting. While he is walking on the ground or blockades he does not shoot to advance. He will only shoot to advance when he is in the air.

3. Sea Page

This page totally differs from the first two pages, because SASA floats in the sea, thus the player must shoot upward more frequently in order to position SASA for destroying the octopi and pick up energy bottles.

4. Astro Page

As there is unlimited energy and bullet for SASA in this page, the player must skillfully move SASA in all directions and the trigger button should always be pressed for speedy maneuvering.

WARNING: For all SVI-318 users, please add SVI-601/SVI-602 Expander together with SVI-803/SVI-807 16K/64K RAM Cartridge to play this game.
