

To learn English words in an interesting and enjoyable way.

Have you ever felt at a loss of words? Do you find your English vocabulary a bit inadequate? Or else you intend to improve your spelling? It sounds boring to flip through pages of dictionary. Here's a game of great fun to help you. Try FINDIT.

1. Hook up your computer to TV or monitor. Also connect cassette player to computer.

2. Turn all units on.

3. Insert tape. Rewind fully. Type:

load **ENTER**

Wait till the followings appear:

Found: findit
Ok

4. Press **F5** to run the program. Follow the instructions on the screen. Also refer to this instruction manual for details.

Tips on Handling and Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.

Let's select the easiest one by pressing <1>. The puzzle is on the way to be constructed. Be patient as you see the screen as shown below:

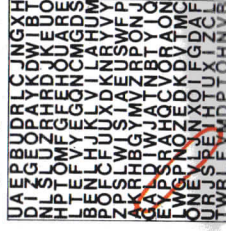

You will hear a sound accompanied with the appearance of an asterisk as the loading process is going on. Finally the puzzle appears:

A 15 x 15 grid will appear on the left-hand side of the screen, filled with letters. Hidden on this grid are 10 words on a specific topic that you have chosen previously (fruits and vegetables in this case). The objective is to find the 10 words which are listed on the right-hand side of the grid.

Search through the grid. Found a word?

Then move the cursor to the first letter of the word and press the space bar. To move around the grid use either the 4 arrow-keys or the letter keys corresponding to the "compass" you see on the screen. After pressing the space bar, the computer will ask for the direction of the word. Answer this question with the relevant letter from your "compass". The computer will then ask you for the length of the word (from 2 to 10 letters). The resulting word will appear on the screen. If this is the word you wanted press **Y** if not press **X** and continue searching.

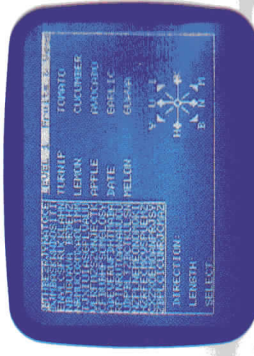

If you found the correct word, the computer will color that word in the grid. Don't forget there are a total of 10 words to be found. If you get tired or fed up, enter **ESC** to see the 10 words.

At the end of the game, press **ESC** to start the game again.

Level 1

The 10 words appear beside the grid and the player must find these words.

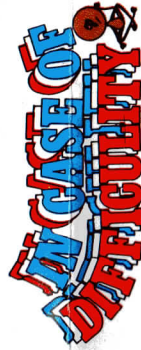

Level 2

The words do NOT appear beside the grid. Here the player must find the words by his knowledge of the topic alone.

Level 3

In this level, the words appear beside the grid. However, in the grid the letters of each word are jumbled except for the first letter of each word, which remains in place.

If the cursor is located on the row for "DIRECTION", these eight keys are used to indicate the location of the "found" word.

Note: If the cursor is located on the border of the grid, pressing some of the above mentioned keys does not effectuate any movement of the cursor.

SPACEBAR

This causes the cursor to jump out from the grid.

[?] []

This displays the answer as you wish to give up trying.

[ESC]

This returns to the menu screen for your game play selection.

1. As the program is in progress, and the computer hangs up, press **CTRL** and **STOP** keys simultaneously. When the "Ok" prompt is displayed, press **F5** to run the game.

2. Turn off power to all equipment and check all connecting cables.

Rewind tape and try again.

Type cloud followed by **[ENTER]**

[K] East	[I] Northeast
[N] South	[M] Southeast
[H] West	[B] Southwest
[U] North	[Y] Northwest

WARNING: For all SVI-318 users, please add SVI-601/SVI-602 Expander together with SVI-803/SVI-807 16K/64K RAM Cartridge to play this game.

SPECTRAVIDEO SOFTWARE AND ACCESSORIES LIMITED 90-DAY WARRANTY

SPECTRAVIDEO warrants the original software game workmanship and materials for a period of 90 days from the date of purchase. If the software game is found to be defective within this time, we will, at our discretion, either replace the software, or refund the purchase price. This warranty does not cover any damage to the hardware or any other accessories.

This warranty is limited to electronic circuitry and mechanical parts originally provided by SPECTRAVIDEO and does not cover any damage to the hardware or any other accessories. This warranty shall be void if the software game is found to be defective as a result of the defect in the hardware or any other accessories.

respect. This warranty is in lieu of all other express warranties and does not constitute an admission of liability. SPECTRAVIDEO shall be responsible for the repair or replacement of the software game. SPECTRAVIDEO shall be liable for any special, incidental, or consequential damage resulting from possession, use or malfunction of this software.

Sometimes do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages. Some jurisdictions do not allow the exclusion or limitation of liability for consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
