NINJA™ ENTERTAINMENT PROGRAM

Tips on Handling and Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.

- 1 ONE JOYSTICK
- 2 TWO JOYSTICKS

Press 2 if you want two joysticks control.

4. Escape Feature

To put the game on pause, just press **[ESC]** once. To resume action, press **[ESC]** the second time.

5. If during a game, you desire to start all over again, press **[CTRL]** and **[STOP]** simultaneously. The game will start from game mode selection page.

6. Restart from Gameover

If you want to play again as a game is over, just press any key.

DESCRIPTION & OBJECTIVE

NINJA is basically a one player game with four pages. The main character is a Ninja. His purpose is to gain the diamonds placed inside an underground castle. Ninja is armed with a sword or some darts.

Firstly, Ninja has to pass through a tunnel which leads to the castle. In the tunnel, there are many bats on the top. They fly up and down, and drop stones randomly. Also, a knife-car which passes from right to left is a dangerous weapon.

For the sake of gaining diamonds, Ninja has to kill all the opponents in the castle. A diamond will only appear when its protector is killed.

After gaining all eight diamonds, Ninja should escape from the castle. The tunnel is the same as the one in the first page. There are eight keys hanging on the wall.

This tunnel leads to the exit of the castle. The door will only be opened as eight keys are collected.

The exit is built on the top of a well. There is a string in the middle of the well, so Ninja can use it for climbing up. Also Ninja should avoid the attack of bat and the opponents on left and right side.

1. Key/Diamond Count: Indicate number of keys/diamonds remaining.
2. Ninja Count: Indicate number of Ninja remaining.

3. Time Count: Indicate time remaining.

4. Scores: Position of players' scores and high score are shown. Score for current player will be indicated by Roman number, e.g. player 1 is I, player 2 is II.

1. Page 1

Passing through the tunnel to castle (page 2) is the objective of "this page". Avoid collision with knife-car, falling object from bat and fire.

3. Page 3

The tunnel is same as the one in page 1, except there are eight keys tied on eight strings which are hung on the wall. To gain all the keys is the objective in this page. There are two attacking throws: one is fast and the other is slow. These two arrows are flying in opposite directions. Ninja should avoid them or else fight back with darts.

2. Page 2

When Ninja enters page 2, the door of the tunnel is closed. There are three levels of stages and swinging logs, and eight opponents protecting eight diamonds. Ninja can go up and down these levels by climbing a string. There are two ways of attack: one is squatting and then setting up with a sword; another is jumping with a sword. As Ninja approaches his opponent, the latter slides and attacks. A diamond appears after the opponent has been killed. However, a diamond will disappear and the opponent will reappear once time limit is reached.

Remark: (1) In practice level, opponent only jumps to attack.

(2) In practice level, no time limit is set.

SPECTRAVIDEO SOFTWARE AND ACCESSORIES LIMITED 90-DAY WARRANTY

SPECTRAVIDEO warrants to the original purchaser that the SPECTRAVIDEO software is free of defects in material and workmanship for a period of 90 days from the date of purchase. SPECTRAVIDEO agrees to either repair or replace, at its option, free of charge, any software discovered to be defective within the 90-day period. This warranty applies to software purchased with proof of date of purchase at its Factory Service Center.

This warranty is limited to the electronic circuitry and mechanical parts originally provided by SPECTRAVIDEO and is not applicable to normal wear and tear. This warranty shall not be applicable and shall be void if the defect in the software has arisen through abuse, unreasonable use, mis treatment or

neglect. This warranty is in lieu of all other express warranties and no other representation or claims of any nature shall be binding on or obligate SPECTRAVIDEO. Any implied warranties applicable to this software are limited to the 90 days period described above. In no event will SPECTRAVIDEO be liable for any special, incidental, or consequential damage resulting from possession, use or malfunction of this software.

Some states do not allow limitations on how long an implied warranty lasts and/or the exclusion or limitation of incidental or consequential damages so the above limitations and/or exclusion or limitation of liability may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

SPECTRAVIDEO INC.
100 BOX 350
PLAINVILLE, NY 11803

Remark: (1) In practice level, no fast arrow and fire gate appears.

(2) The arrows can be shot.

4. Page 4

Ninja should avoid bats and weapon from his opponent on both sides as he fights his way to the exit. All bats, weapons and opponents can be shot. Beware there is fire flaming at the end of a string.

Remark: In practice level, no shadow of bat appears.

5. Gameover

Gameover for a player when there is no more Ninja left.

The player can start from different skill level according to the instruction shown in the selection page. Whenever he finishes every four pages twice, he will move up to a higher level. For example, if he starts at level 3, then he will move up to level 4.

In this game, the game play is the same for different skill levels. Each skill levels differ from the other according to the following criteria:

1. Appearing frequency of falling stone from bat in page 1, 3 and 4.
i.e. Objects appear more frequently for higher levels.
2. Time of two consecutive knife-cars, arrows and attack from opponents in page 1, 3 and 4 respectively.
i.e. Shorter time for higher levels.
3. Attacking speed of opponent in page 2.
i.e. Shorter time for higher levels.
4. Existence of fire gate, fire ball, fast arrow and bat in page 1, 2, 3 and 4 respectively.
5. Time delay of disappearance of diamond on page 2.

Both player 1 and player 2 can use joystick or the keyboard cursor keys. If two Joysticks are used for two players, then player 1 can use joystick 1 and player 2 can use Joystick 2.

1. Joystick and keyboard cursor key
a. Right : Walking right.
b. Left : Walking left.
c. Up : Jumping or climbing up.

- d. Down : Jumping or climbing down.
- e. Right & Up : Jumping to swing log or stage on the right side.
- f. Left & Up : Jumping to swing log or stage on the left side.

2. Trigger or space bar or **RIGHT GRPH** input: these inputs cause different effects on different pages.

- a. Page 1 : No effect
- b. Page 2 : Sword is drawn from Ninja, only when he is squatting or jumping up.
- c. Page 3 : Dart is shot.
- d. Page 4 : Dart is shot.

SCORING

1. Page 1
Avoid a falling stone
100
2. Page 2
Kill an opponent
100
Gain a diamond
300
3. Page 3
Avoid a falling stone
100
Gain a key
300
Shoot an arrow
50
4. Page 4
Kill an opponent
200
Kill a bat
50
5. The three digits of time count add to score whenever a page finishes. For example, time count is 921, then 900 will be added to your score.

An extra Ninja will be given for finishing every 4 pages (move to a higher level) unless the player already has 7.

1. Page 2

In this page, the opponent has two attacking means. His sliding gesture tells the way of attack. If an opponent uses jumping attack, Ninja should squat to avoid, then set his sword and get up as his opponent is on the ground again. Otherwise the player should jump before his opponent gets up and set sword to kill.

2. Page 3

In this page, the player should shoot down the arrow so the player has enough time to gain the key. If the arrow is shot, the delay time of its consecutive one will be longer. The player should take care the fast arrow first.

3. Page 4

In this page, the player should avoid the attack of bat skillfully. During idle time (i.e. after killing an opponent), Ninja should rush to his near opponent's level and shoot. The level between two consecutive stages is safe from the attack from bats.

WARNING: For all SVI-318 users, please add SVI-401/SVI-402 Expander together with SVI-803/SVI-807 16K/64K RAM Cartridge to play this game.
