GAME DESCRIPTION

"Kung Fu Master" is a one player fighting game with 2 pages. The main character of this game is the "Kung Fu Master" who can kill the wooden dummies by his side-kick(s) and punch(es).

In the first page, the Master should try to kill a number of dummies and finish passing through the wooden poles tunnel. After finishing these jobs, he can go to page 2.

The game play of the second page is different from the first page. He searches for parts of a broken key stored behind big cups. After he finds the key part, he should move it to the appointed position and try to combine it. Moreover, he should kill a number of wooden dummies. After finishing this he can go back to page 1 and play again.

When the dark red wooden dummy appears, the Master must use the side kick to attack the dummy at a proper distance. When the dark blue wooden dummy appears, the Master must punch the dummy at a distance a little further than the side kick attacks.

OBJECTIVE

The player should control Kung Fu Master to finish as many missions as he can to obtain the highest score.

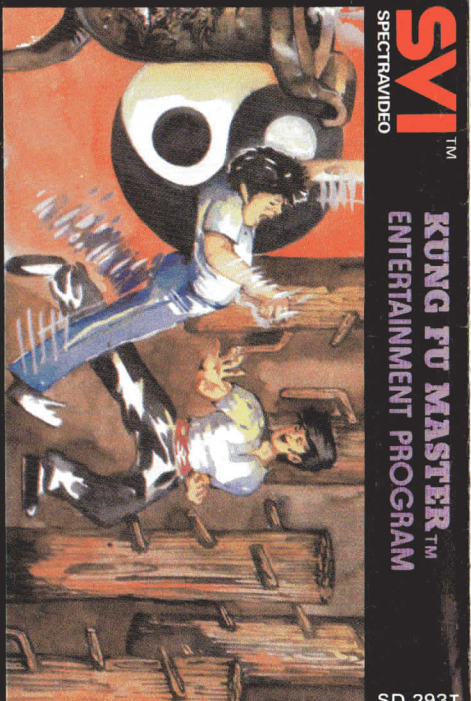

PANEL INDICATOR

1. Dummies number indicator
Indicates the number of dummies that the Master should kill. When any dummy is killed, the dummies count will decrease by one until it equals to zero.

2. Kung Fu Master number indicator
Indicates the number of Master left, including the one that the player(s) is playing. The smallest Master number is one and after this Master is killed, game is over.

3. Scores
Score of the current player will be indicated by a flashing black and white Roman number square in front of the player's score.

4. Time count indicator
Indicates the time left for the player. The game would be over if time count is equal to zero.

- Tape on Handling and Storage**
1. Avoid touching the tape with your fingers, you may cause drop-outs or scratches.
 2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
 3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.

4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.
5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.
6. To preserve valuable or prized recordings, punch out and remove the erasure prevention lug on the top edge of the cassette.

5. Page 1 Master finish tunnel map indicator

Indicates the distance left for the Master to approach the end of the tunnel.

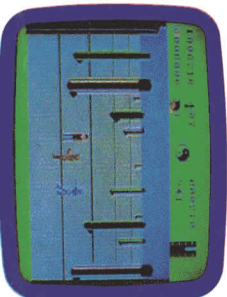

GAME PLAY

1. Page 1 (wooden poles tunnel)

In this page the player should control the Master to kill an appointed number of dummies and to walk to the end of the tunnel. The moving area of Master is about one fifth from the bottom of the screen and so are the dummies. The player should finish the above jobs in the appointed time limit.

For level 2, 3 (or 5, 6), a green knife would appear at random to attack the Master. Master would be killed if the upper half of his body is touched by the knife.

Note: For level 3 (or 6), one of the dummy will change to green after a short time of its appearance. Then it will change to a green ball in a short period of time. If the lower half of the Master's body is touched by the green ball, he will be killed.

2. Page 2 (Chinese big cups and key)
- In this page, the Master should kill a number of dummies and try to combine a broken key. The broken key part is placed behind the big Chinese cup. The Master should use his side-kick or punches to break the cups.

For the magenta cup, the Master should punch the center of the cup twice to break it. For the light yellow cup, the Master should kick the center of the cup twice to break the cup.

After breaking the cup, if part of the key appears, the Master should carry it to the proper key position at once. Don't break any more cups after part of the key appears because the chance to get the broken key part is directly related to the number of cups left.

This page will end if the player finishes killing the appointed number of dummies and combining the broken key parts into a good key within the time limit.

3. Game Over
When the last Master of the player is killed, the game ends for that player.

SKILL LEVELS

The player can start from any level. Each level consists of four pages (in the order of page 1, page 2, page 1 and then page 2). Whenever the player finishes four pages, he will move up to a higher level. For example, if he starts at "practice only" level then he will move up to normal play level. However, if he completes all pages in the arcade level, he will go to level with the increasing number of dummies and speed. Of course, there is a limit for the speed.

Each level differ from the other according to the following criteria:

	Practice Only	Normal Play	Arcade Level
Page	1	2	1 2
Knife	No	No	Yes Yes Yes
Green ball	No	No	No Yes Yes
Dummy Killed by one attack	Yes	Yes	Yes No No
Dummy killed by two attacks	No	No	No Yes Yes
Moving broken key part	No	No	No No Yes
Game start dummy number	8	4	8 4 8 4

Notes: 1) After every two pages (page 1 and 2), the dummy count will increase by 2 and so on until 20.

ii) Dummy count of page 2 is always four less than page 1's.
