Tips on Handling and Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.

3. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.

6. To preserve valuable or prized recordings, punch out and remove the erasure prevention tab on the top edge of the cassette.

Instructions

1. Once loaded the program will display the copyright credits, then a brief description of the game.
2. Press and your off... The screen will be drawn. Your plane will appear on the left hand side and move to the right, slowly dropping towards the village as it goes.
3. Press the to drop bombs and blow away the buildings below you.
4. Once your plane has reached the right hand side, it will make a second pass, starting from the left. This sequence will repeat itself until you either destroy all the buildings or hit one of them.
5. If you successful destroy all the buildings you will land safely. Otherwise your plane will be devastated against the buildings.
6. In either event you are given the option to play again: simply press and your off again for another round.
7. Good lucky all you World War one flying aces...

In the Event of Difficulty

1. If the program is in progress, and the computer hangs up, hold down the key while pressing the key. When the "Ok" prompt is displayed, press to run the game. If this fails to eliminate the problem try step 2.
2. Turn off all equipment and check all connecting cables.

Rewind tape and retry the procedures outlined in "Getting Started".

Introduction

Your World War I bi-plane has been disabled: you are descending rapidly towards an abandon village. You must clear away a runway or be torn apart by the buildings below you. A keen eye and quick reflexes are required to blow away the buildings and land successfully.

Hardware Requirements

1. SVI-318 or SVI-328 Computer
2. Data Cassette

Getting Started

1. Hook up your computer to the TV or monitor and connect the data cassette as per the instructions in your User's Manual.
2. Turn all units on.
3. Insert tape. Rewind fully. Type:

Wait until the filename is **Found** and the "Ok" prompt appears.

4. Press to run the program. Refer to the instructions section for details.
