

SVI™
SPECTRAVIDEO

Screen Display

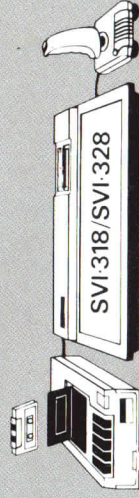

Tips on Handling and Storage

1. Avoid touching the tape with your fingers; you may cause drop-outs or scratches.
2. Protect your cassette from dust and damage when not in use by keeping it in its protective plastic box.
3. The tape should be wound snugly on the cassette reels; if the tape is loose, carefully wind it on to one of the reels by gently turning one of the hubs.
4. Keep the recorder head and pinch roller clean by regular use of a good cassette head cleaner.

5. Avoid prolonged exposure of cassettes to excessive heat, sunlight and strong magnetic fields. Do not store near heating appliances, TV sets or similar equipment.

6. To preserve valuable or prized recordings, punch out and remove the erasure prevention tab on the top edge of the cassette.

330 Roulette

Instructions

1. Once loaded the program will display the title page. There are 4 players in the game. The banker possesses \$100,000 and each player will be given \$5,000.
2. Four players will play the game of roulette. The program will prompt your input for each player in the game. Type "y" to the prompt if you wish the computer to play the specified player number or type "n" if you would like to control that player yourself. (Note your input must be in lower case letters)

Introduction

Place your bet. Spin the wheel. Will you win the pot or go bust -- find out with Roulette. Play with friends or the computer in this 4 player computerized version of the popular game of chance.

Hardware Requirements

1. SVI-318 or SVI-328 Computer
2. Data Cassette

Getting Started

1. Hook up your computer to the TV or monitor and connect the data cassette as per the instructions in your User's Manual.
2. Turn all units on.
3. Insert tape. Rewind fully. Type:

load ENTER

Wait until the filename is **Found** and the "Ok" prompt appears.

4. Press **F5** to run the program. Refer to the instructions section for details.

3. There are 6 options for you to set on. (See below)
 - on a total number:
 - any integer from 1 to 36
 - on a longitudinal row of numbers:
 - either 1, 2 or 3
 - on the 1, 2, or 3 dozen of numbers:
 - 1 to 12, 13 to 24 or 25 to 36
 - on a plain or crooked number:
 - even or odd number
 - on red or black number
 - on the 1 or 2 half of numbers:
 - 1 to 18 or 19 to 36
4. A rectangular block with random black or red numbers is drawn on the screen. The money you and the other players betted will be placed in the appropriate compartment. The number resulting from the spin is shown at the top right hand corner.
5. The result of the game will be displayed. If one wins, the money will be doubled.

6. The game will continue until all players are bankrupt.

In the Event of Difficulty

1. If the program is in progress, and the computer hangs up, hold down the **CTRL** key while pressing the **STOP** key. When the "Ok" prompt is displayed, press **F5** to run the game. If this fails to eliminate the problem try step 2.
2. Turn off all equipment and check all connecting cables.

Rewind tape and retry the procedures outlined in "Getting Started".
