Choosing a home computer is a bit like playing a video game. The more you play, the better you get. So you'd expect people who spend their working life choosing computers to be pretty good at the game. Quick to shoot down a fault. Pleased when they find an improvement.

"The first cheap, high performance computer..."

"Double precision numbers... are ideal for companies with turnovers under £999,999,999,999.99."
