

This Christmas don't buy your children a present, buy them a future!

Your children are the most precious investment you can ever make. They are also the most expensive. So it makes sense to give them the best possible start in life.

And in 1984 that means making sure they know how to handle a computer. Because only the computer literate will make it in the decades to come. But aren't computers expensive? And with so many brands to choose from which one should you invest in anyway.

The Spectravideo Computer.

Home computers in many respects resemble Hi-Fi. On the outside they all look much the same. It's what's inside that matters. And that's where the astonishing Spectravideo Computer comes into its own, because Spectravideo Computers are the most powerful systems in their class. To begin with, unlike the Commodore VIC 20, The Tandy TRS 80 and the Sinclair Spectrum, the Spectravideo is capable of almost infinite expansion. The 318 for example starts with 32K of Read Only Memory. And that's over twice that of the Spectrum and four times the more expensive Tandy.

What's more it can be expanded to 144K which is twice that of the Apple II, which is almost five times as costly. And the 318 is only half as powerful but as versatile as the 328.

The world's most understandable computer.

The Spectravideo Computer System has been created for first time computer users. Using CP/M and Microsoft Basic and complete with a comprehensive do-it-yourself manual the Spectravideo is probably the world's most understandable computer!

Work. And Play.

There is an infinite variety of programs available for the Spectravideo. Educational, scientific, financial and of course there's a range of games—including Coleco Vision. And to

make the 318 even more fun it even has its own built in joystick.

The better computer company.

Spectravideo Computers are distributed throughout Australia by Videoactiv Electronics, one of Australia's most professional computer companies.

Just \$399.

Yes! The powerful, versatile Spectravideo range of computers from Videoactiv Electronics costs from just \$399. So this Christmas don't buy your children a present, buy them a future.

Spectravideo

The world's most understandable computer.
