VZ-200 SOFTWARE

Little Packer. This is a version of Pacman with the player having to move around the screen munching dots. There are four ghosts in the maze who track and try to eat you. If you eat one of the four pills around the maze, the roles temporarily change and you become the hunter. When you have eaten most of the dots, a gate appears. Colour, sound and on-screen scoring. Joystick or keyboard option.

SEND S.A.E. FOR LATEST CATALOGUE.

If you have any marketable quality VZ-200 programs which you would like us to market, write to us for terms.
